INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces provided on the answer booklet.

Answer any **four** questions.

Write your answers on the separate answer booklet provided.
If you use more than one booklet, fasten them together.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question.
Sketch maps and diagrams should be drawn wherever they serve to illustrate an answer.

This question paper consists of 4 printed pages.

[Turn over

Answer any **four** questions.

1 (a) Define the terms:

- (i) terrestrial radiation,
- (ii) insolation,
- (iii) albedo.

[6]

(b) Describe the six factor day model of the atmosphere's energy budget.

[12]

(c) How do human activities affect local temperatures?

[7]

2 (a) Explain the concept of heat budget.

[6]

(b) **Figure 2** shows the tricellular model of atmospheric circulation.

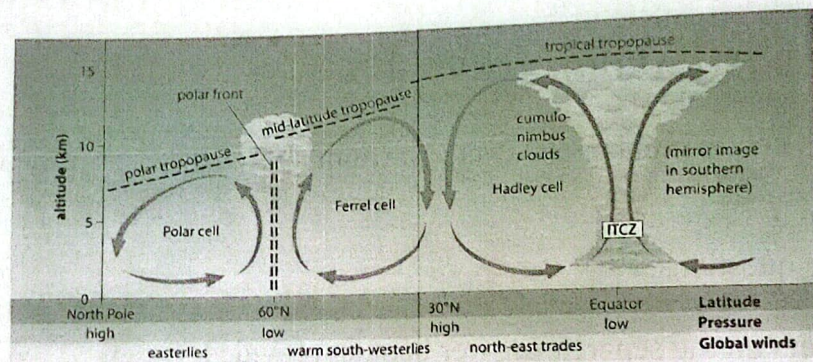

Figure 2

Explain how the earth-atmosphere energy budget is achieved.

[12]

(c) To what extent is climate change a product of human activities?

[7]

3 (a) Outline the causes of condensation.

[6]

(b) Explain the development of the following results of condensation:

- (i) hoar frost,
- (ii) dew,
- (iii) radiation fog,
- (iv) rime.

[12]

(c) How do human activities influence the amount of rainfall in an area?

[7]

- 4 (a) Define the following;
- (i) through flow,
 - (ii) through fall,
 - (iii) stemflow.
- [6]
- (b) Explain any **four** factors that affect the amount of infiltration in a drainage basin. [12]
- (c) Explain the impact of climate change on soil moisture storage. [7]
- 5 (a) Differentiate between accordant and discordant drainage patterns. [6]
- (b) Describe the development of the following river features.
- (i) levees,
 - (ii) river cliff,
 - (iii) flood plain.
- [12]
- (c) Evaluate the effectiveness of measures that are taken to reduce siltation in rivers. [7]
- 6 (a) Explain the following terms;
- (i) aquifer,
 - (ii) aquiclude,
 - (iii) water table.
- [6]
- (b) Explain any **four** factors that affect variations in the water table in seasonally humid tropics. [12]
- (c) To what extent are Indigenous Knowledge Systems (IKSs) reliable in predicting occurrence of groundwater? [7]

- 7 (a) Define the following terms:
- (i) rock joint,
 - (ii) bedding plane,
 - (iii) scree.
- [6]
- (b) Describe any **four** chemical weathering processes. [12]
- (c) To what extent do human activities influence weathering processes? [7]
- 8 (a) Explain the following terms:
- (i) climatic climax vegetation,
 - (ii) primary plant succession,
 - (iii) plagioclimax vegetation.
- [6]
- (b) Outline characteristics of the Mediterranean biome. [12]
- (c) Evaluate the effectiveness of measures that are taken to conserve tropical grassland ecosystems. [7]
- 9 (a) Draw a well labelled diagram of a soil profile. [6]
- (b) With reference to Tropical areas, explain any **four** soil forming factors. [12]
- (c) Assess the effectiveness of measures that are taken to improve the quality of Tropical soils. [7]
- 10 (a) Compare exhumation and pediplanation processes. [6]
- (b) Describe the formation of the following inselbergs:
- (i) bornhardt,
 - (ii) castle kopje,
 - (iii) tor.
- [12]
- (c) What benefits can people get from granite landforms in their communities? [7]
