INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number on the answer booklet provided.

Answer **four** questions, **one** question from each of sections **A, B, C** and **one** other question from any section.

Write your answers on the separate answer booklet provided.

If you use more than one booklet, fasten them together.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question.

Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.

This paper consists of **9** questions.

This specimen paper consists of 7 printed pages.

Section A

Answer at least **one** question from this section.

- 1
 - (a)
 - (i) List **three** minerals found in a granite rock. [3]
 - (ii) Describe how sedimentary rocks are formed. [5]
 - (b)
 - (i) Describe any **two** processes of river transportation. [4]
 - (ii) With the aid of well labelled diagrams explain exfoliation weathering. [8]
 - (c) Explain how local people can benefit from landforms such as Chinhoyi Caves. [5]
- 2
 - (a) **Figure 2** is a model of a weather instrument.

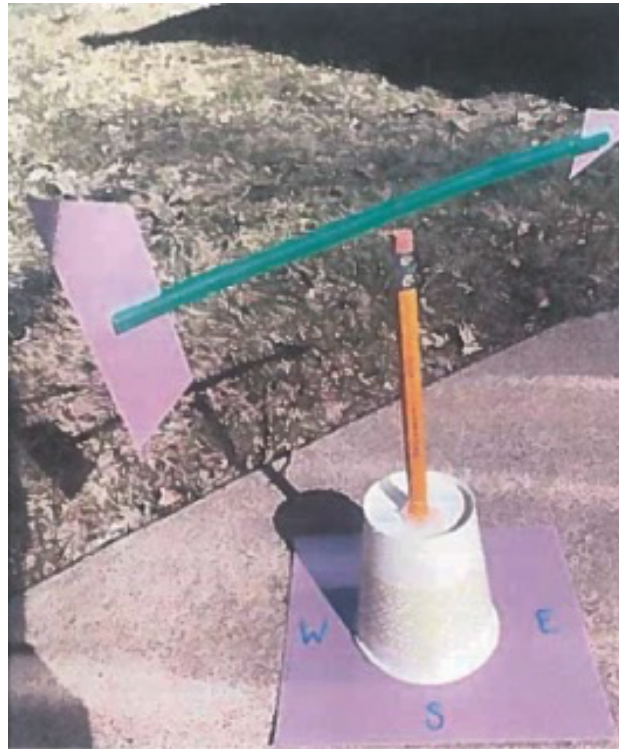

Fig. 2

- (a)
 - (i) Name the instrument in **Fig. 2**. [1]
 - (ii) State **three** materials used to make the model. [3]
 - (iii) Explain how the model can be improved for use by local people. [4]
- (b) “In Gweru the sky was overcast with dark grey cumulonimbus clouds. A thunderstorm with lightning flashes was observed. Strong winds of 25 knots blew from the North East. Temperature was 20°C and pressure was 980 millibars with rain shower getting stronger each time.”
 - (i) Draw a station model to record the weather conditions for Gweru. [7]

- (ii) The table below shows maximum and minimum temperatures for Bulawayo.

Day	Mon	Tue	Wed	Thu	Fri
Max Temperature °C	29	18	29	30	34
Min Temperature °C	23	14	10	11	12

Calculate the diurnal temperature range for Bulawayo on Tuesday. [2]

- (iii) State any **three** precautions against the weather in Bulawayo on Friday afternoon. [3]

- (c) How can a family protect itself against flooding. [5]

- 3 (a) (i) What is a *wetland*? [2]

- (ii) State **three** types of wetlands. [3]

- (iii) List **three** benefits of wetlands to rural communities in Zimbabwe. [3]

- (b) (i) Describe characteristics of wetland ecosystems. [6]

- (ii) Which human activities negatively affect wetlands. [6]

- (c) Suggest sustainable solutions to wetland deterioration in Zimbabwe's cities. [5]

Section B

Answer at least **one** question from this section.

- 4** **(a)** **(i)** What is *sustainable use of resources*? [2]
- (ii)** Classify the following into renewable and non-renewable resources.
- Mopane worms (amacimbi/madora), river, coal, sand, lithium, fish. [6]
- (b)** Study the extract below. It is about the benefits of the CAMPFIRE programme to Zimbabwe's rural communities.
- CAMPFIRE (Communal Areas Management Programme for Indigenous Resources) operates in Binga. It has benefitted Binga's local communities. Its aim is to encourage wildlife conservation while at the same time generating income through tourism and sustainable utilisation of natural resources. Human wildlife conflict is a problem especially elephants which damage crops and houses. The income generated is invested in building schools, health care and fencing fields to keep wildlife away.
- (i)** State **three** objectives of CAMPFIRE. [3]
- (ii)** State **three** problems facing people before the introduction of CAMPFIRE. [3]
- (iii)** Evaluate the role of CAMPFIRE in the socio-economic development of Zimbabwe's rural areas. [6]
- (c)** Suggest other strategies to solve human-wildlife conflict in areas such as the Zambezi Valley. [5]
- 5** **(a)** **(i)** State any **four** minerals found in Zimbabwe. [4]
- (ii)** State any **four** factors which influence mining in Zimbabwe. [4]
- (b)** **(i)** What is *panning*? [2]
- (ii)** Describe characteristics of panning. [6]
- (iii)** Describe how indigenous knowledge systems are used in prospecting for gold. [4]
- (c)** Suggest how gold panning can increase the Gross National Product (GNP) of Zimbabwe. [5]
- 6** **(a)** **(i)** Name the types of industries represented by the following economic activities; mining, insurance, car assembly, farming and research development. [5]

- (ii) State any **three** examples of secondary industries in Zimbabwe. [3]
- (b)
 - (i) Explain any **three** factors influencing the location of secondary industries. [6]
 - (ii) Outline health and environmental problems associated with manufacturing industries. [6]
- (c) Design an environmental health checklist to determine the level of safety at a local company. [5]

Section C

Answer at least **one** question from this section.

- 7 (a) (i) What is a *settlement*? [2]
- (ii) Outline the differences between rural and urban settlements. [6]
- (b) (i) Draw a labelled diagram of an urban concentric landuse model. [7]
- (ii) Explain how this model is applicable to developing countries' cities such as Harare. [5]
- (c) Suggest measures to deal with environmental degradation in most urban settlements in Zimbabwe. [5]

- 8 (a) (i) State the sources of the following types of energy; [4]
- biogas, nuclear, hydroelectric and geothermal. [4]
- (ii) What are the advantages of using solar energy? [4]
- (b) (i) The table below shows economic importance of energy in agriculture.

uses of energy	economic importance
Fertilizer	25 %
Farm equipment	30 %
Water abstraction	15 %
Transportation	10 %
Processing	13 %
Packaging	7 %

Explain how the information above can help Zimbabwean farmers in their planning. [7]

- (ii) What problems are facing communal farmers in their attempt to use renewable energy? [5]
- (c) Suggest ways of solving the energy crisis in Zimbabwe. [5]

- 9**
- (a)**

 - (i)** Outline the causes of road accidents in Zimbabwe. [6]
 - (ii)** What are the challenges facing development of pipelines? [2]
 - (b)**

 - (i)** Explain how road accidents can be reduced in Zimbabwe. [6]
 - (ii)** What problems does the government face in trying to eliminate road accidents? [6]
 - (c)** Evaluate government efforts to help victims of road accidents. [5]
