PAPER 1 Multiple Choice

4022/1

1 hour 15 mins

NOVEMBER 2025 SESSION

1: 50 000 Survey map is enclosed with this question paper.

Additional materials:

Multiple Choice answer sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

Mathematical set

Calculator

INSTRUCTIONS TO CANDIDATES

Answer **all** questions. For each question, there are four possible answers, **A, B, C** and **D**. Choose the correct answer. Record your choice in **soft pencil** on the separate answer sheet provided.

Read carefully the instructions on the answer sheet.

INFORMATION FOR CANDIDATES

There are **forty** questions in this paper. Each correct answer will score **one** mark. Any rough working should be done in this question paper.

This question paper consists of 14 printed pages.

Mapwork

For questions 1-12 refer to 1:50 000 map of Kezi, Zimbabwe.

- 1 In which grid would one find a human feature?
 - A 6480007694000
 - B 6510007695000
 - C 6520007694000
 - D 6490007695000

- 2 What is at grid point 6452007690200?
 - A Spot height
 - B Trigonometrical station
 - C National monument
 - D Hut

- 3 What is the direction of flow of the Babuli river?
 - A South east
 - B North east
 - C North west
 - D South west

- 4 What is the distance between Zinti dip tank in grid 6540007684000 from the quarry in grid 6520007684000?
 - A 2.8 km
 - B 2.7 km
 - C 2.5 km
 - D 2.0 km

- 5 What is the gradient between the trigonometrical station in grid 6500007691000 and the spot height in grid 6480007689000?

A 1:14
 B 1:17
 C 1:22
 D 1:28

6

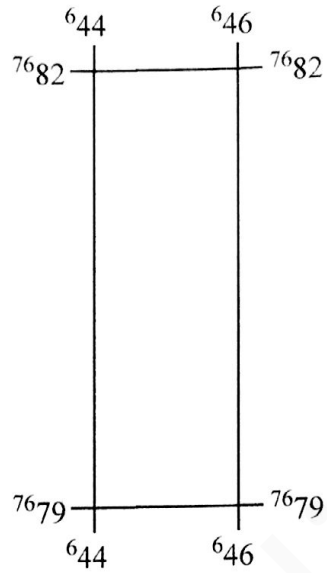

The river channel shown in the map extract above can be described as

A meandering.
 B straight.
 C bending.
 D braiding

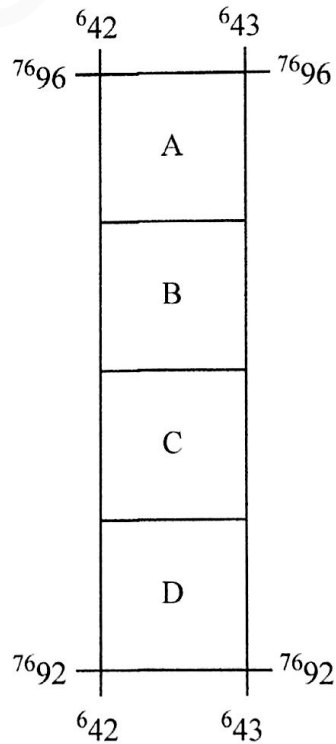

7

The road in the area shown follows a

- A foothill.
- B plateau.
- C ridge.
- D watershed.

8

Which of the areas **A**, **B**, **C** or **D** has the highest stream density?

- 9 What is the area under cultivation in grid 6480007685000?
- A 2km².
 - B 1.5km².
 - C 1.0km².
 - D 0.6km².
- 10 The landform KEZI in grid 6490007691000 is a
- A col.
 - B knol.
 - C plateau.
 - D ridge.
- 11 What is the best site for building a school?
- A 6460007695000
 - B 6510007681000
 - C 6460007680000
 - D 6500007691000
- 12 Which economic activity is suitable for people living in grid 6430007695000?
- A Mining
 - B Hicking
 - C Fishing
 - D Hunting

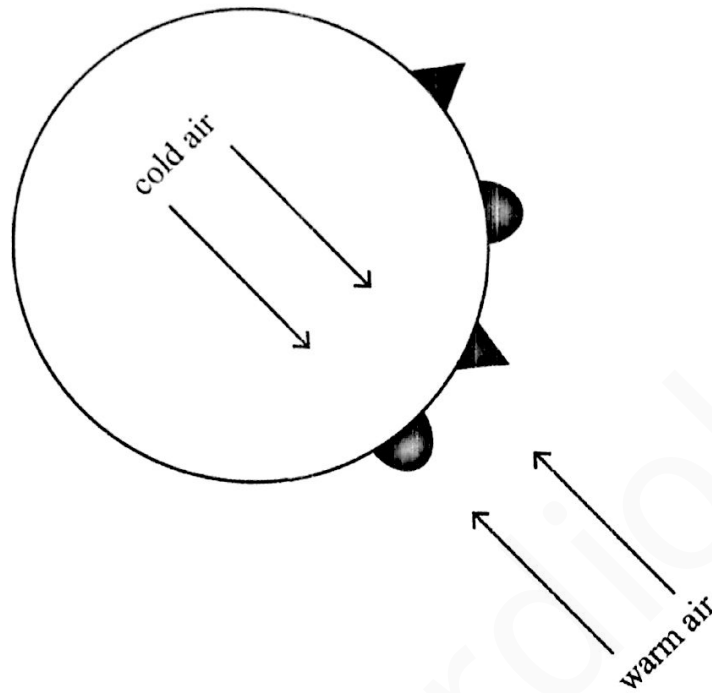

Physical Environment

- 13 The space segment component of a global positioning system is made of
- A computers.
 - B satellites.
 - C monitors.
 - D compass.
- 14 Which one is a climate change induced hazard?
- A Volcano
 - B Earthquake
 - C Drought
 - D Blizzards
- 15 Lines joining places with the same amount of rainfall are called
- A isohyets.
 - B isobars.
 - C isotherms.
 - D isotheres.

16

What is the weather condition shown?

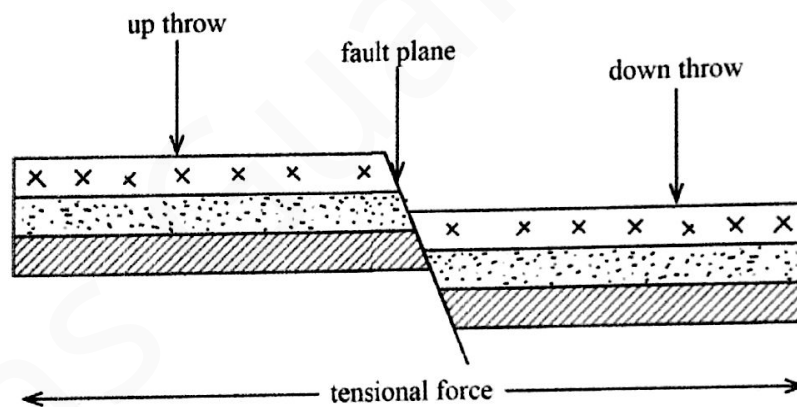

- A A cold front
 - B A warm front
 - C An occluded front
 - D A stationary front
- 17 The western region of Zimbabwe receives very low amounts of rainfall due to
- A descending warm moist air.
 - B rising warm moist air.
 - C rainshadow effect.
 - D rising cold dry air.
- 18 Which one is an example of a metamorphic rock?
- A Granite
 - B Gneiss
 - C Sandstone
 - D Chalk

- 19 A volcano that has not erupted in human history is called
- A an active volcano.
 - B a dormant volcano.
 - C an extinct volcano.
 - D a sleeping volcano.

- 20 Limestone rocks are
- A impermeable.
 - B impervious.
 - C pervious.
 - D permeable.

21

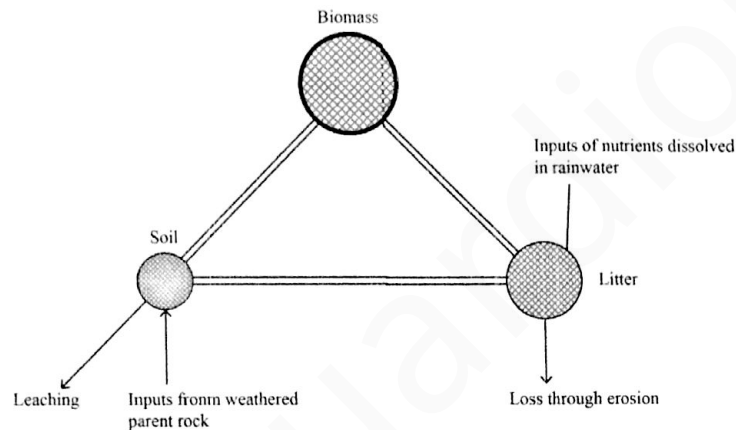

Which type of fault is shown?

- A Normal
 - B Reverse
 - C Tear
 - D Complex
- 22 What is the role of the biogeochemical cycle in an ecosystem?
- A Facilitates flow of energy
 - B Provides energy to the ecosystem
 - C Provides water to the plants
 - D Provides nutrients to the plants

- 23 How can wetlands be conserved?
- A By building homes in the area
 - B By culling
 - C By draining excess water
 - D By fencing

24

Which biome is shown in the diagram above?

- A Desert
 - B Rainforest
 - C Savanna
 - D Mediterranean
- 25 In a desert biome, nutrients are largely stored in the
- A biomass.
 - B litter.
 - C soil.
 - D humus.

Economic Geography

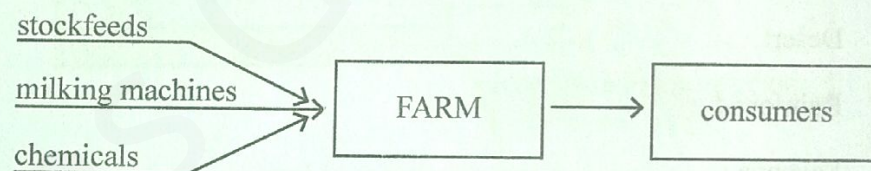

26

Why would tourists visit the area shown?

- A For scenic viewing
- B For a cool climate
- C For bird watching
- D For boat cruising

27

The farming system shown is

- A dairying.
- B horticulture.
- C poultry.
- D ranching

28 Animal diseases can be controlled by

- A castrating.
- B dehorning.
- C paddocking
- D vaccinating.

- 29 Cost benefit analysis in mining ensures
- A safe mineral extraction.
 - B the government subsidises mining.
 - C mining is done profitably.
 - D minerals are exported.
- 30 Land reform is
- A relocating communal farmers.
 - B leasing land to suitcase farmers.
 - C acquiring land on large farms.
 - D an agrarian reform involving redistribution of land.
- 31 Which is an example of a raw material based industry?
- A Shoe manufacturing
 - B News printing
 - C Car assembly
 - D Bakery
- 32 What is the reason for continued illegal mining in Zimbabwe?
- A unemployment.
 - B high returns.
 - C lack of legislation.
 - D mineral discovery.

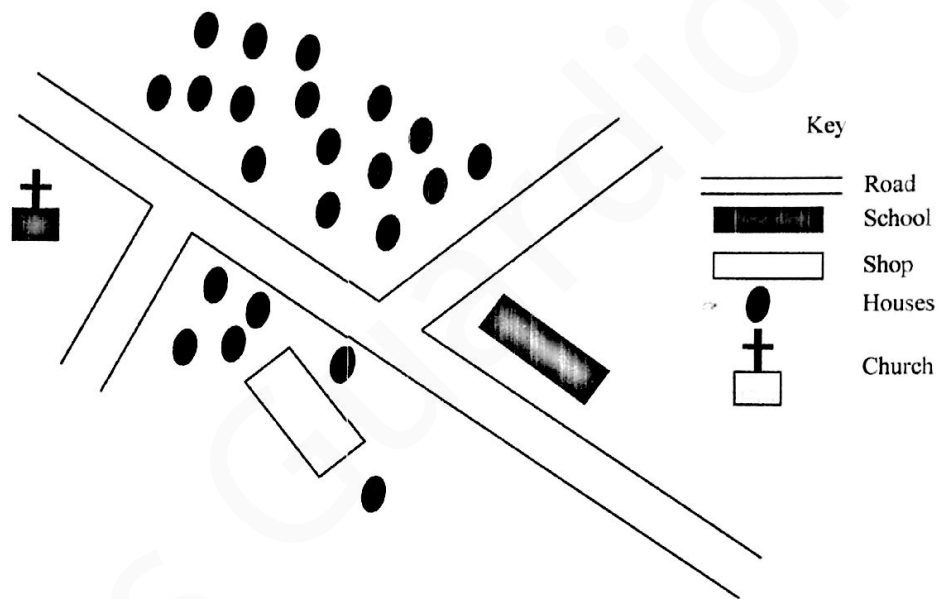

Population and Settlement, Environmental Management, Transport and Trade

33 Overpopulation occurs when

- A there are less people than the resources available in an area.
- B there are more resources than the people available in an area.
- C there are more people than the resources available in an area.
- D there are less resources than the people available in an area.

34

The settlement pattern shown above is

- A dispersal.
 - B nucleated.
 - C linear.
 - D circular
- 35 How can local authorities of cities such as Harare deal with the problem of illegal settlements?
- A Legalising shanty settlements
 - B Arresting squatters
 - C Providing basic amenities
 - D Constructing low cost houses

36

country	in-migration	out-migration
South Africa	20 000	8 000
Zimbabwe	5 000	45 000
Mozambique	2 000	80 000
Malawi	3 000	78 000

Using information in the table above, which country has a positive net migration?

- A Malawi.
- B South Africa.
- C Mozambique.
- D Zimbabwe.

37

EXPORTS	VALUE \$	IMPORTS	VALUE \$
Gold	896 million	Petroleum	1.19 billion
Diamonds	206 million	Maize	285 million
Tobacco	383 million	Electricity	162million

The illustration above is best described as

- A favourable balance of trade.
- B unfavourable balance of trade.
- C visible trade.
- D invisible trade.

38

Streambank cultivation leads to

- A weathering.
- B deforestation.
- C transportation.
- D siltation.

- 39 The major cause of load shedding in Zimbabwe is
- A introduction of prepaid meters.
 - B introduction of solar systems.
 - C limited power generation.
 - D use of energy savers.
- 40 Why is a preferential trade area established?
- A To reduce capital inflows
 - B To increase movement of prohibited goods
 - C To increase movement of refugees
 - D To eliminate tariff barriers
