GEOGRAPHY
PAPER 2

4022/2
2 hours 30 minutes

JUNE 2025 SESSION

Additional materials:
Answer booklet

INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces provide on the answer booklet.

Answer **four** questions, **one** question from each of sections A, B, C and **one** other question from any section.

Write your answers on the separate answer booklet provided.

If you use more than one booklet, fasten them together.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question.

Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.

This question paper consists of 11 printed pages.

[Turn over

Section A (Physical Geography)

Answer at least one question from this section.

- 1 (a) (i) Explain the term mitigation in relation to disaster risk management. [2]
 (ii) State the benefits of granite landforms in Zimbabwe. [5]
 (b) Photograph 1 below shows a hazard.

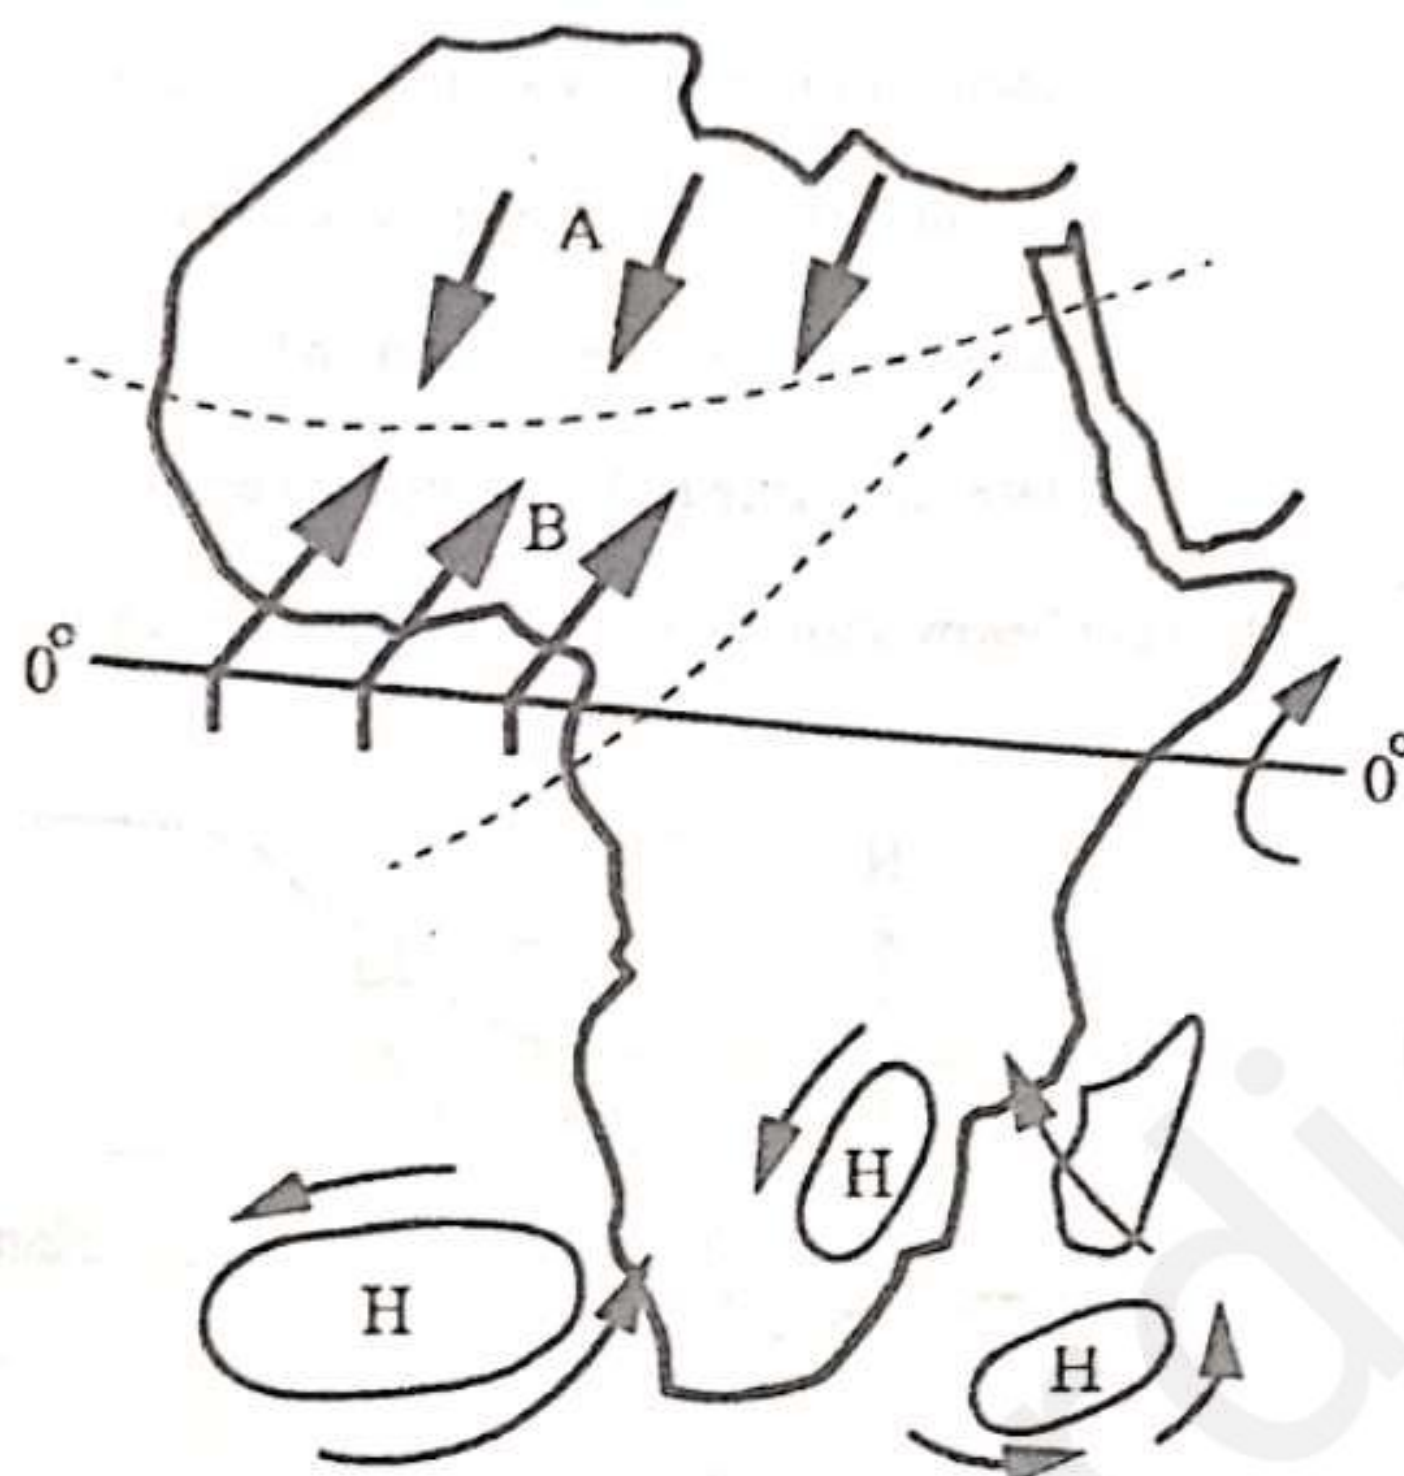

Source: Internet

Photograph 1

- (i) Identify the hazard shown in the **photograph** above. [1]
 (ii) Describe the causes of the hazard shown in the **photograph** above. [5]
 (iii) Explain how the above hazard affects people. [5]
 (c) Suggest measures to reduce hazards caused by mass movements in mountainous areas. [7]
- 2 (a) (i) State any **three** tropical climates in Africa. [3]
 (ii) Describe any **four** factors that influence global temperature variations. [4]

- (b) (i) The map below shows pressure systems over Africa in July.

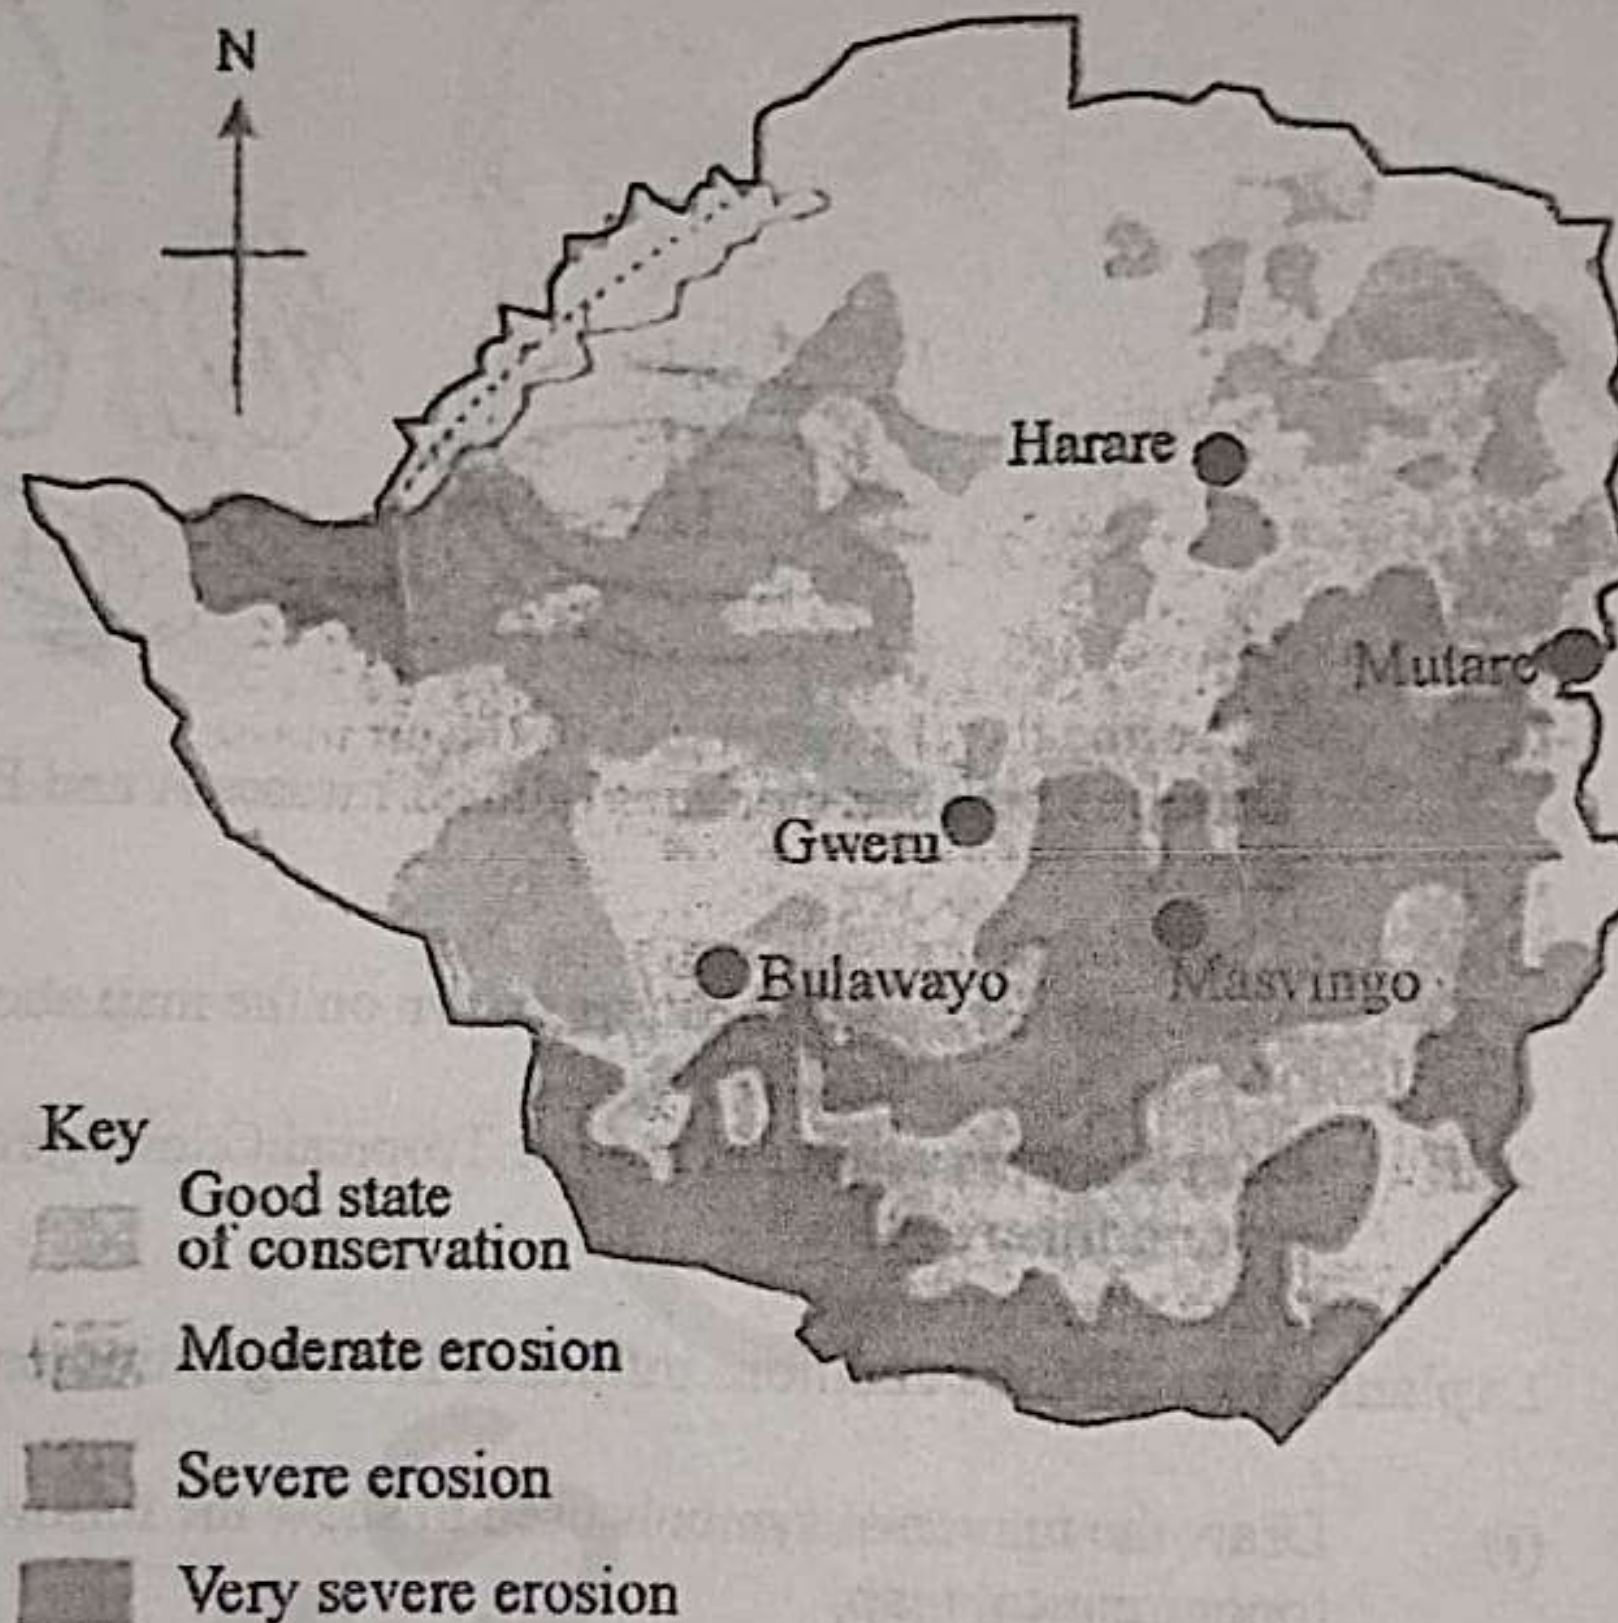

- Describe the characteristics of the air masses A and B on the map above. [6]
- (ii) Describe the pressure patterns shown on the map above. [4]
- (iii) Explain the position of the Inter Tropical Convergence Zone (ITCZ) over northern Africa. [1]
- (c) Explain how climatic conditions influence farming activities in Zimbabwe. [7]
- (a) (i) Draw the universal symbols used to show the following features on a topographical map;
hut,
bridge,
dip tank,
church [4]
- (ii) Identify the colours used to represent the following on topographical maps;
drainage features,
roads,
and relief. [3]
- (b) (i) Explain ways in which Geographic Information Systems (GIS) can be used in National Parks. [4]

4022/2 J2025

[Turn over]

- (ii) Describe the uses of the electromagnetic spectrum in everyday life. [7]
- (c) (i) Identify problems associated with the use of GIS in mapping. [4]
- (ii) Explain how the problems associated with the use of GIS can be solved. [3]
- (a) (i) Explain the terms *food chain* and *trophic level*. [4]
- (ii) State any three soil forming processes. [3]
- (b) The map below shows the state of soil erosion and conservation in Zimbabwe.

- (i) Explain the distribution of soil erosion in Zimbabwe as shown on the map above. [7]
- (ii) Describe measures that can be implemented to reclaim soil in severely eroded areas. [4]
- (c) (i) Outline the importance of conserving wetlands in our communities. [4]
- (ii) Identify challenges that may prevent proper wetland conservation. [3]

Section B (Economic Geography)

Answer at least one question from this section.

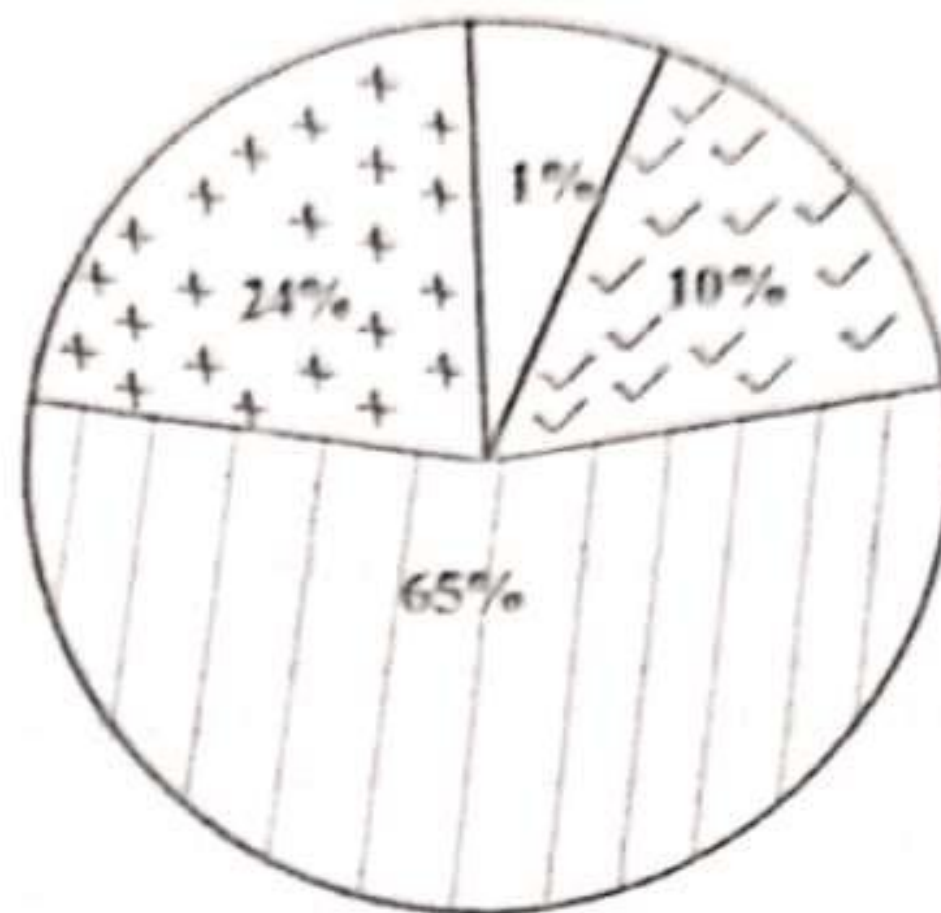

- (a) (i) Explain the meaning of '*sustainable use of natural resources*'. [2]
- (ii) Outline the impact of unsustainable use of forest resources in Zimbabwe. [5]

- (b) The Table below shows daily use of water at household level.

Uses of water	Quantity in litres
cooking	10
drinking	12
washing	80
bathing	60
toilet flushing	100

- (i) Using the information in the Table above, outline ways to conserve water at household level. [4]
- (ii) Explain the impact of borehole drilling in high density residential areas of large cities such as Harare. [3]
- (iii) Explain the importance of dams. [4]
- (c) Suggest steps that can be taken to conserve wildlife in Zimbabwe. [7]
- (a) (i) Explain the meaning of '*indigenisation*' in mining. [2]
- (ii) Outline the importance of indigenisation in Zimbabwe. [5]

- (b) Figure 6 below shows causes of deaths of miners in Southern Africa in 2015.

key

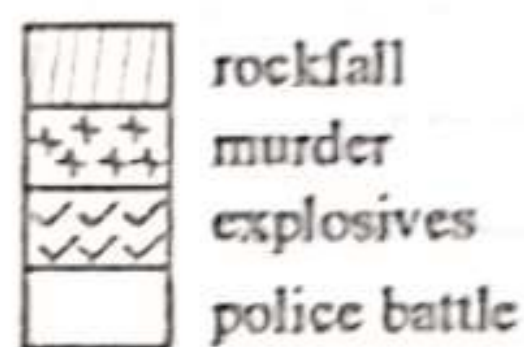

Fig. 6

- (i) Name the technique used to show the causes of deaths of miners in Fig. 6 above. [1]
- (ii) Describe the proportions in the causes of deaths of miners shown. [4]
- (iii) Identify any other two causes of deaths of miners other than the ones shown in Fig 6. above. [2]
- (iv) Outline the social and economic challenges caused by mining. [4]
- (c) Outline measures that can be taken to reduce gold leakage in Zimbabwe. [7]
- (a) (i) State any three forms of agribusiness. [3]
- (ii) Outline the importance of agribusiness in Zimbabwe. [4]

- (b) The map below shows the distribution of dairy cattle in Zimbabwe.

- (i) Explain the distribution of dairy cattle shown on the map above. [6]
- (ii) Describe the effects of diseases on dairy cattle in Zimbabwe. [5]
- (c) Examine measures that farmers should take to protect crops from pests and diseases. [7]
- (a) Outline the characteristics of
- (i) Small and Medium Enterprises (SMEs), [4]
- (ii) Transnational Corporations. [3]

- (b) **Photograph 2** below shows Small and Medium Scale Enterprises (SMEs) in Zimbabwe.

Source: Internet

Photograph 2

- (i) Describe the business activity shown in Photograph 2 above. [5]
- (ii) Outline the problems associated with business operations such as the one shown in Photograph 2 above. [6]
- (c) Suggest solutions to challenges faced by Small and Medium Scale Enterprises in Zimbabwe. [7]

Section C (Population and Settlement, Environmental Management, Transport and Trade)

Answer at least one question from this section.

- 9 (a) (i) Name any two uranium producing countries in Africa. [2]
- (ii) State the advantages and disadvantages of setting up a nuclear power plant in a country. [5]

- (b) (i) Figure 9 below shows oil production.

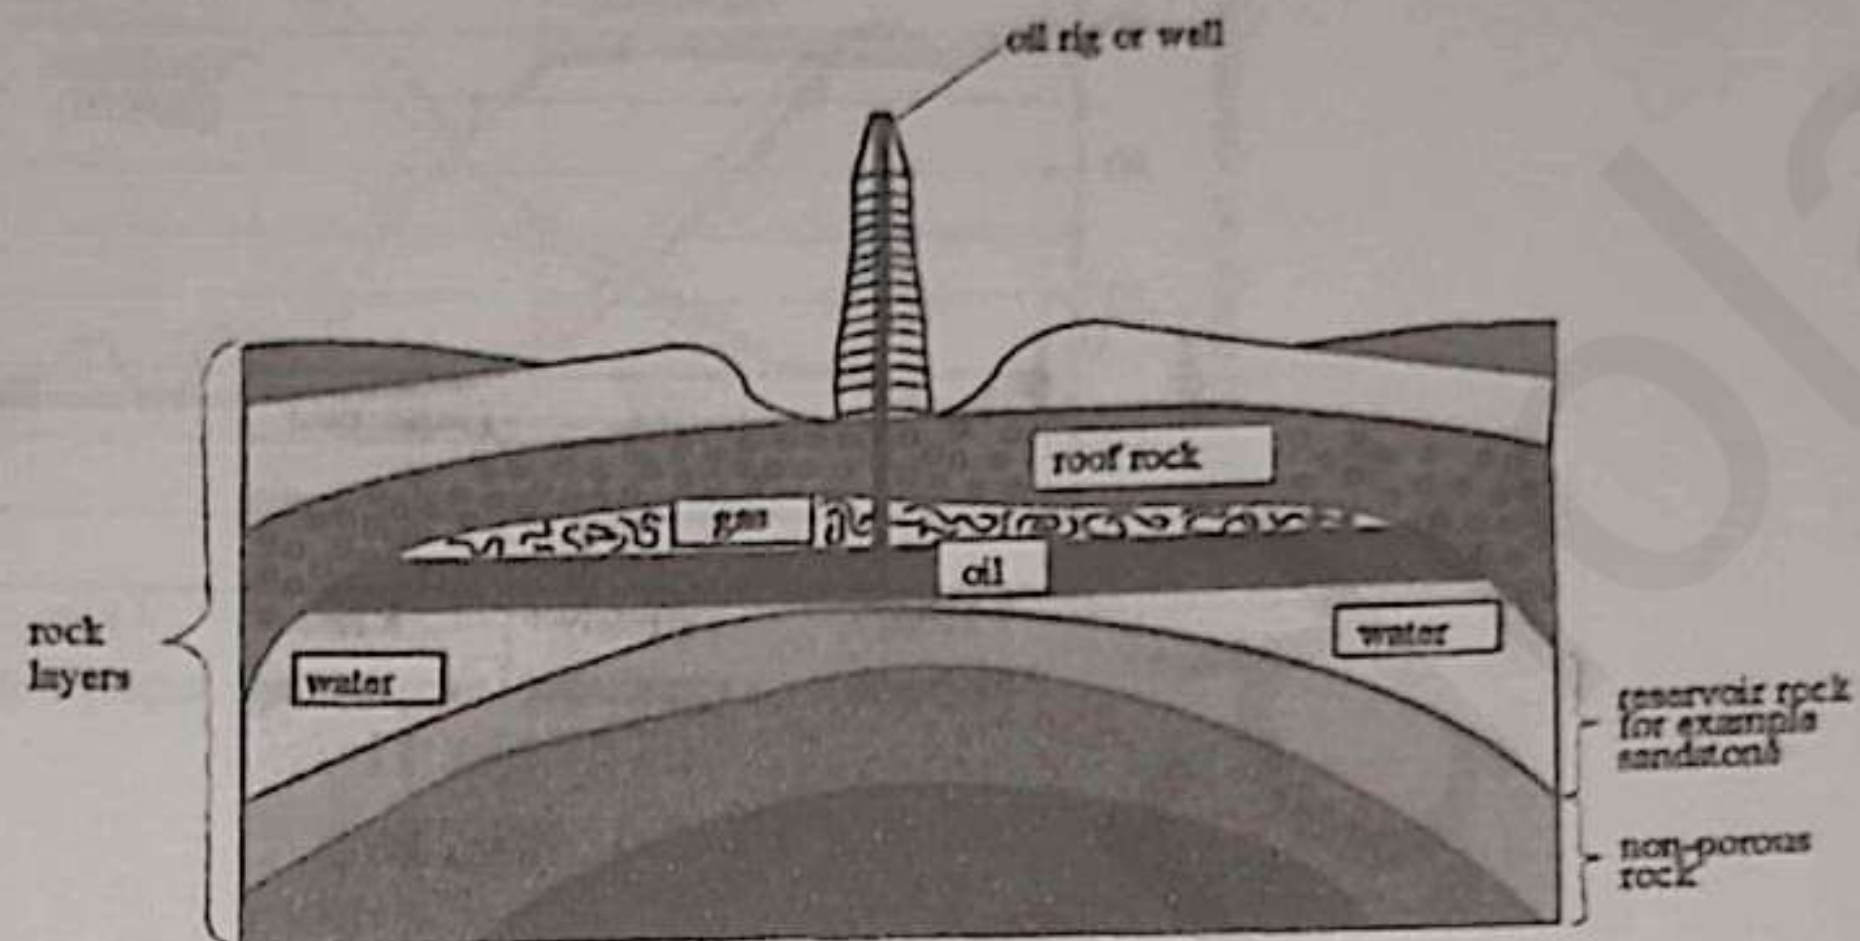

Fig 9

Describe the method of extracting oil shown in Fig 9 above. [4]

- (ii) Identify any two oil transportation methods. [2]
- (iii) Outline any five environmental problems resulting from oil drilling and its transportation. [5]

- (c) Suggest solutions to environmental problems resulting from the use of fossil fuels. [7]

- 10 (a) (i) Explain the meaning of *land use planning*. [2]
- (ii) Describe any five land uses in either a rural or an urban area. [5]

- (b) Design a poster for your local community on environmental management awareness. [11]

- (c) Evaluate the success of Environmental Management Agency (EMA) in dealing with environmental issues in Zimbabwe's large cities. [7]

- 11 (a) (i) Explain the terms *population distribution* and *infant mortality*. [4]
- (ii) State any three aspects of a population found in a census questionnaire. [3]

(b) Figure 11 below shows the demographic transition model.

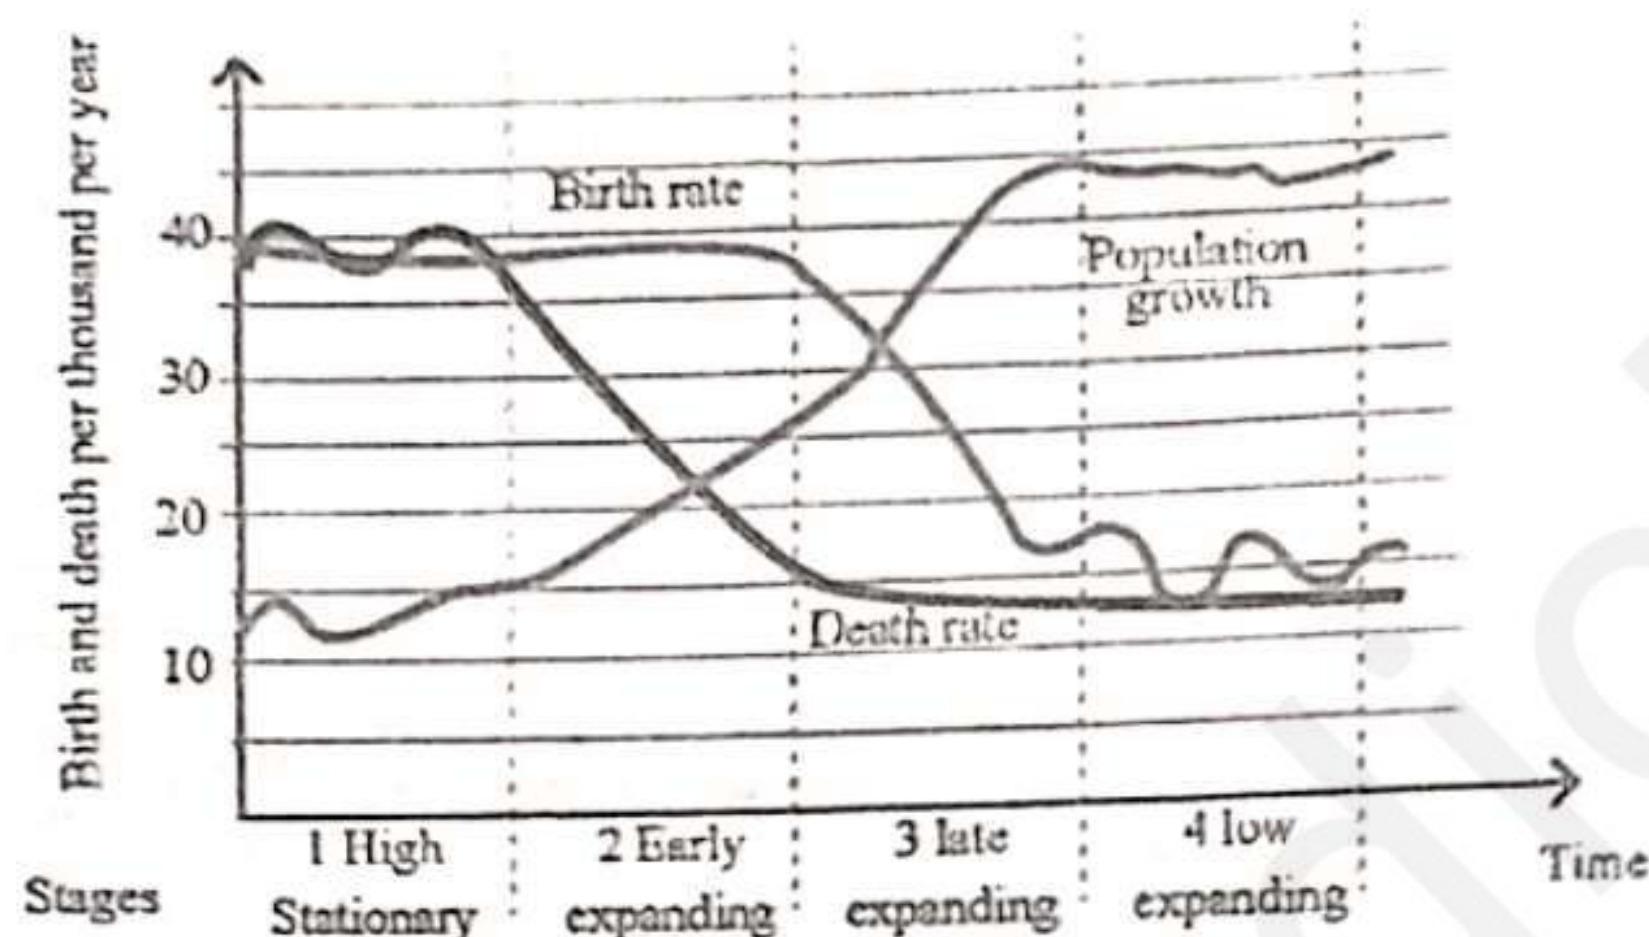

Fig. 11

- (i) Explain the population changes of a country in stage 3 of the demographic transition model as shown in Fig. 11 above. [6]
- (ii) Outline any five pull factors of migration. [5]
- (c) Suggest measures that should be taken to reduce the spread of Covid-19. [7]
- 12 (a) (i) Identify any three modes of transport used by people in your area. [3]
- (ii) Outline any four advantages of containerisation in international trade. [4]
- (b) The Table below shows exports and imports of three developing countries, X, Y and Z.

Country	Import \$ US	Export \$US	BALANCE OF TRADE
X	1 400	1 335	-
Y	1 700	2 678	-
Z	2 334	5 424	-

- (i) Explain the meaning of *balance of Trade*. [2]
- (ii) Calculate the balance of trade for countries X and Z. [4]
- (iii) Describe the trading patterns of countries X and Z. [2]

- (iv) Explain the pattern of trade for country Z. [3]
- (c) Suggest measures to reduce traffic congestion in large urban areas of Zimbabwe. [7]
