

DARRELL MUCHERI

Software Developer

darrelmucheri@gmail.com | +263 719 647 303 | [Portfolio](#)

GITHUB : <https://github.com/mrfr8nk>

PROFESSIONAL SUMMARY

Developer with hands-on experience building web applications, internal tools, AI and automation systems for SMEs across hospitality, tourism, education and e-commerce sectors. Strong foundation in JavaScript, React, Python, and modern web technologies with practical experience designing responsive interfaces, integrating APIs, and automating business workflows.

Comfortable translating business requirements into functional software solutions and working independently across frontend and backend integration tasks. Self-taught software developer with practical experience in web development, AI, and automation, currently working toward pursuing a BSc. In Computer Science and Engineering.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), Python, PHP, Java

Frontend

React, HTML5, CSS3, Tailwind CSS, Responsive Design

Concepts

OOP, API Integration, Workflow Automation, System Design

Backend & Integration

REST APIs, Node.js, PostgreSQL, MongoDB, SQL

Tools

GitHub, CI/CD Concepts, Linux Basics

PROFESSIONAL EXPERIENCE

Software Developer | *Exquisite Camping* | Feb 2026

- ▶ Designed and developed a centralized booking and reporting web application to manage the full reservation lifecycle
- ▶ Built internal admin dashboards reducing manual administrative workload by 35%
- ▶ Implemented automated CRM workflows reducing customer response time by over 40%
- ▶ Developed chatbot-based inquiry qualification logic to automate repetitive customer queries
- ▶ Redesigned company website UI improving user experience and customer self-service
- ▶ Integrated multi-channel inquiry management system into a unified digital workflow

Freelance Developer | *Remote* | Jan 2024- Present

- ▶ Built responsive web applications for schools, libraries, e shops using React, JavaScript, and modern CSS frameworks
- ▶ Developed frontend dashboards integrated with REST APIs
- ▶ Implemented workflow automation connecting web forms to CRM and messaging platforms
- ▶ Designed cloud-based deployment proposals including cost modelling and architecture documentation
- ▶ Delivered frontend performance optimizations improving page load speed and engagement

Founder & Lead Developer | *Fundo AI* | 2026 – Present

- ▶ Designed and developed an AI-powered educational chatbot focused on helping Zimbabwean students access learning assistance through WhatsApp and web platforms
- ▶ Built conversational AI workflows capable of answering academic questions, explaining concepts, generating study materials, and supporting ZIMSEC-aligned learning
- ▶ Developed an AI-powered RAG system for retrieving and using questions from Zimbabwean examination papers and educational resources
- ▶ Implemented automated question extraction and categorization workflows for past examination papers, including subject and topic classification

- Integrated AI, messaging, document-processing, and external API services into a unified educational platform
- Designed subscription and usage-based feature systems for AI chat, image generation, project generation, and educational resources
- Developed backend services and database workflows for managing users, usage limits, educational resources, and platform features
- Deployed and maintained the platform across cloud infrastructure while continuously improving reliability, performance, and user experience

Digital Officer | *Traverze Travel* | Feb 2025 - Feb 2026

- Developed and maintained internal web tools supporting booking and reporting operations
- Implemented frontend improvements to company digital platforms increasing online inquiry flow
- Integrated third-party APIs to streamline travel booking workflows
- Supported deployment and hosting infrastructure for web applications
- Contributed to SEO-driven frontend optimization improving organic search visibility

IT Intern | *Traverze Travel* | Jul 2025 - Mar 2026

- Assisted in development and technical integration of travel platforms
- Automated weekly newsletter distribution replacing manual processes
- Supported configuration of IP telephony system and internal network setup

IT Support Intern | *Astro Mobile Zimbabwe* | Jun 2025 - Dec 2025

- Delivered internal training sessions on new OS upgrades, firmware updates, and device feature releases to support staff, improving first-contact resolution rates
- Resolved approximately 60% of customer support tickets independently without escalation
- Collaborated with R&D teams during device testing cycles to identify bugs and usability issues prior to product release

EDUCATION & CERTIFICATIONS

AWS Certified Solutions Architect - Practitioner (*In Progress*)

Network Security | *Cisco Networking Academy* | Jul 2025

Introduction to Cybersecurity | *Cisco Networking Academy* | Jun 2025

NDG Linux Unhatched | *Cisco Networking Academy* | Jul 2025

Nat. Foundation Certificate in Computer Operations & Packages | *HEXCO* | Dec 2025

O level Zimsec : A's, 1'B, 2'Cs
