INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces provided on the answer booklet.

Answer **all** questions in Section A, **one** question in Section B and **one** question in Section C.

Write your answers on the separate answer booklet provided.

If you use more than one booklet, fasten them together.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question.

Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.

This question paper consists of **seven** questions.

This question paper consists of 6 printed pages and an Insert.

Copyright: Zimbabwe School Examinations Council, J2026.

SECTION A: STATISTICS

Answer **all** questions.

1 (a) Define the following statistical terms:

(i) frequency, [1]

(ii) ordinal data, [1]

(iii) ratio data. [1]

(b) **Table 1** shows the number of vaccines administered to 30 babies in one month at a local clinic.**Table 1**

Number of vaccines	Frequency
0 – 3	5
3 – 5	8
6 – 8	10
9 – 11	4
12 – 14	3

Draw a frequency polygon using the midpoints and frequencies in **Table 1**. [8]

(c) A researcher claims that a pharmacy sells 6 vaccines per week.

(i) State the null and the alternative hypothesis. [4]

(ii) A pharmacy's weekly sales of vaccines are:

Week 1 = 5

Week 2 = 7

Week 3 = 6

Calculate the weekly mean. [2]

Calculate the standard deviation. [4]

(d) A meteorologist predicts that Marondera will receive rainfall on one of the 7 days of the week.

Find the probability that the rain will fall on a weekend day. [4]

SECTION B: MAPPING

Answer **one** question.

- 2 (a) Study the map extract provided 1 : 50 000 Muchirakuenda, Zimbabwe.
- Draw a labelled sketch map to show relief and drainage features of the area. [12]
- (b) Explain the relationship between relief and drainage on the map. [8]
- (c) Explain how relief has influenced human activities found on the map. [5]

- 3 (a) You are provided with a scanned map of Zimbabwe.
- Open QGIS and perform the following tasks.
- (i) Load the scanned map of Zimbabwe and digitize the following features:
- Beitbridge- Victoria Falls road,
 - Plumtree- Masvingo-Mutare road,
 - Change colour to red and increase width to 1,6. [6]
- (ii) Digitize Mwenezi river up to its confluence with Limpopo river.
- Change colour to blue and increase width to 1.0 [2]
- (iii) Digitize the following urban centres:
- Plumtree,
 - Bulawayo,
 - Masvingo,
 - Mutare,
 - Victoria Falls,
 - Lupane,
 - Betbridge.
- Change points to square shape
 - Change colour of the square to black
 - Change size to 3.0
 - Produce a hard copy of your answer. [6]

- (b) (i) Use the scanned map of Zimbabwe to create new shapefiles for the following provinces:
Matabeleland North,
Manicaland,
Masvingo,
Mashonaland East.
Save as Zim Provinces. [4]

- (ii) Use the information in **Table 3** to classify the map into 4 classes. Produce a hard copy of the classified map.

Table 3

Name of Province	Population size
Matabeleland North	475 000
Matabeleland South	685 000
Masvingo	905 000
Manicaland	1 125 000

[7]

- (a) (i) State any **two** types of satellite orbits. [2]
- (ii) Describe any **two** uses of satellite images. [2]
- (b) The components of remote sensing system are; Energy source, Radiation, Interaction with target, Recording of energy by scanner, Transmission/Reception, Interpretation, and Analysis.
- (i) Use the information listed above to draw a flow diagram of the remote sensing components. [6]
- (ii) Explain the stages in remote sensing. [6]
- (c) Explain how remote sensing is applied in environmental management. [5]
- (d) Describe how LIDAR and RADAR works in remote sensing. [4]

SECTION C: RESEARCH TECHNIQUES

Answer **one** question.

- 5 (a) Explain the meaning of pH of a soil. [2]
- (b) (i) Describe how soil pH can be measured. [5]
- (ii) Describe any **four** ways that cause differences in pH of a soil. [4]
- (c) Table 5 shows soil samples.

Table 5

Soil sample	pH value
A	5
B	8

- (i) State which soil is
acidic,
alkaline. [4]
- (ii) Explain why acidic soils are found on the surface while alkaline soils are found underground. [4]
- (d) Explain the importance of pH value to plant growth. [6]
- (a) Table 6 shows employment structures for selected countries.

Table 6

Country	% employed in primary industry	% employed in secondary industry	% employed in tertiary industry
A	80	10	10
B	78	12	10
C	3	33	64
D	4	28	68
E	86	8	6
F	2	18	80

- (i) Describe how a survey on employment structure of a country is conducted. [5]
- (ii) List any **six** factors to consider when designing a questionnaire. [6]
- (iii) State any **four** methods that can be used to present data on employment structure of a country. [4]

- (b) Study **Insert 1** which shows types of industries.
- (i) Name the data presentation technique shown on **Insert 1**. [1]
 - (ii) Use **Insert 1** to show the employment structures of countries A to F shown in **Table 6**. [6]
 - (iii) Outline the advantages of the data presentation technique named in (b)(i) above. [3]
- (a) Explain the terms disaster resilience and disaster management. [6]
- (b) Use the following guidelines to develop a disaster management model for a community which periodically experiences drought;
- Risk assessment,
 - Mobilise resources,
 - Preparedness and early warning,
 - Implement mitigation,
 - Relief and recovery,
 - Monitoring and evaluation.
- [12]
- (c) Outline problems facing a community in implementing a disaster management plan. [7]
