

Q1: NOV 2007 P2

- 7 (a) State the method by which cold air over a dam reaches a point inland.

[1]

- (b) Discuss how heat is transmitted by

- (i) conduction in metals,

- (ii) radiation.

[4]

Q2: NOV 2009 P5

- 3 (a) (i) Explain what is meant by the term *internal energy of a gas*.
 (ii) Describe how internal energy of a gas can be changed.

[3]

- (b) Fig. 3.1 shows apparatus used to observe smoke particles at room temperature

6.7 TRANSFER OF THERMAL ENERGY P2, P3&P5 QUESTIONS

Compiled by: *R. Muga* +268 776 162 075

- (i) Describe and explain the observations on the television screen when the video taken is played.
- (ii) Describe and explain the observations, if the experiment is repeated at 273 K. [5]
- (c) Explain why a pot handle made of copper heats up faster than that of wood. [4]

Q3:NOV 2012 P5

- 5 (a) (i) State the method(s) of heat transfer in a liquid.
- (ii) Explain how conduction is different from radiation. [4]

Q4:NOV 2018 P3

- 4 (a) (i) State the *Zeroth Law* of thermodynamics.
- (ii) State any two applications of the *Zeroth Law*. [4]
