

Whole numbers (0–100)

Count, read and write numbers

1. Write the number for each shape on the number square.

1	2	3		5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25		27	28		30
31	32	33	34	35	36		38	39	40
41	42	43		45	46	47	48	49	
51	52	53	54	55	56	57	58	59	60
61		63	64	65	66	67	68	69	70
71	72	73	74	75	76	77		79	80
81	82	83	84	85	86	87	88	89	90
91	92		94	95	96	97	98	99	100

- a)  = ____ b)  = ____ c)  = ____
d)  = ____ e)  = ____ f)  = ____
g)  = ____ h)  = ____ i)  = ____

2. Practise counting forwards and backwards.

- a) 36 38 40 ____ ____ ____ ____ 50
b) 80 75 ____ ____ ____ 55 50 ____
c) 21 24 ____ 30 33 ____ ____ ____
d) 10 15 ____ ____ ____ ____ 40 45

3. Read the numbers.

four

eleven

thirty-one

fifty-nine

ninety-two

twenty-eight

sixty-three

one hundred

eighty-seven

4. Write the words from smallest to biggest.
5. Write the numbers from biggest to smallest.

Practise tens and units

Example

There are two groups of straws. Each group has 10 straws. We say this as 2 tens. There are 4 loose straws. We say this as 4 units.

$$10 + 10$$

$$2 \text{ tens} = 20$$

$$20 + 4 = 24$$

$$1 + 1 + 1 + 1$$

$$4 \text{ units} = 4$$

How many tens and units?

a)

$$\boxed{10} + \boxed{2}$$

$$1 \text{ ten } 2 \text{ units} = \boxed{12}$$

b)

$$\boxed{} + \boxed{}$$

$$\text{--- tens --- units} = \boxed{}$$

c)

$$\boxed{} + \boxed{}$$

$$\text{--- tens --- units} = \boxed{}$$

d)

$$\boxed{} + \boxed{}$$

$$\text{--- tens --- units} = \boxed{}$$

Whole numbers (0–200)

Read and write numbers

You can write numbers as numerals and as words.

Example

	Numeral	Number in words
	157	one hundred and fifty-seven

1. Count the beads on each abacus. Write the numeral and the number in words.

a)

b)

c)

d)

e)

f)

2. Write these words as numerals.

- a) fifty-six
- b) one hundred and fourteen
- c) seventy-eight
- d) one hundred and twelve

Count forwards and backwards in multiples

If you count forwards, you add. The numbers get bigger.

If you count backwards, you subtract. The numbers get smaller.

Example

Start at 32. Count forwards in 2s. Stop at 40.

Start at 150. Count backwards in 2s. Stop at 130.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100
101	102	103	104	105	106	107	108	109	110
111	112	113	114	115	116	117	118	119	120
121	122	123	124	125	126	127	128	129	130
131	132	133	134	135	136	137	138	139	140
141	142	143	144	145	146	147	148	149	150
151	152	153	154	155	156	157	158	159	160
161	162	163	164	165	166	167	168	169	170
171	172	173	174	175	176	177	178	179	180
181	182	183	184	185	186	187	188	189	190
191	192	193	194	195	196	197	198	199	200

1. Count forwards and backwards on the number square.
 - a) Start at 171. Count forwards in 3s. Stop at 198.
 - b) Start at 185. Count backwards in 5s. Stop at 55.
 - c) Start at 16. Count forwards in 4s. Stop at 72.
 - d) Start at 200. Count backwards in 10s. Stop at 20.

2. Complete the counting number patterns.

- a)  36  42  48      144
- b)  200  198       186
- c)  9  18    45  54   72
- d)  112  104      72  64
- e)      35  40  45  50

3. Complete the number pattern and answer the question.
Choose A, B or C.

151    143 141  137

A  B  C 

Homework

Use the number patterns from question 2 above. Which multiple are you counting in?

1.  counts in **6**.
2.  counts in .
3.  counts in .
4.  counts in .
5.  counts in .

Odd and even numbers

You can divide **even** numbers by 2. Even numbers end with 0, 2, 4, 6 or 8. These numbers are all **even** numbers:

12 24 70 128 146 182

You cannot divide an **odd** number by 2. Odd numbers end with 1, 3, 5, 7 or 9. These numbers are all **odd** numbers:

7 43 51 139 165 187

Write the numbers. Circle the even numbers. Underline the odd numbers.

24	<u>111</u>	40	59	92	103	186	199	200	135	68
----	------------	----	----	----	-----	-----	-----	-----	-----	----

Numbers before, after and between

Fill in the numbers **before**, **after** or **between**.

before	between	after
47	48	49

1. Use the number square on page 4 to help you.

- a)

	33	34
--	----	----

 b)

127	128	
-----	-----	--

 c)

56		58
----	--	----
- d)

	99	100
--	----	-----

 e)

174		176
-----	--	-----

 f)

10		12
----	--	----
- g)

	188	189
--	-----	-----

 h)

135	136	
-----	-----	--

 i)

143		145
-----	--	-----

2. Look at the numbers. Answer the questions.

- a) What number comes before 146?

--
- b) What number comes after 189?

--
- c) What number comes between 124 and 126?

--

Count on number lines

When you count forwards on a number line the numbers are **ascending**. The numbers are getting bigger.

When you count backwards the numbers are **descending**. The numbers are getting smaller.

1. Fill in the missing numbers.

- a) 96 99 102 117 120
- b) 142 150 154 162 166 170 184
- c) 100 110 120 160 180 190

2. Write the numbers in order from biggest to smallest.

140 160 195 145 155 170 190 175 185 180 165 150

3. Write the numbers in order from smallest to biggest.

200 191 170 179 185 194 176 182 167 188 173 197

Place value and expanded notation

Build numbers with blocks to show tens and units.

5 tens and 2 units

$$50 + 2 = 52$$

9 tens and

$$90 +$$

4 units

$$4 = 94$$

Break up numbers into tens and units.

Example

$$63 = 6 \text{ tens and } 3 \text{ units}$$

$$63 = 60 + 3$$

$$28 = 2 \text{ tens and } 8 \text{ units}$$

$$28 = 20 + 8$$

Use tens and units cards to build numbers. Look at this example.

$$\boxed{80} + \boxed{7} = \boxed{8} \boxed{7}$$

1. Build and write the numbers.

a) $20 + 1 = \boxed{}$ b) $30 + 2 = \boxed{}$ c) $80 + 0 = \boxed{}$

d) $90 + 4 = \boxed{}$ e) $80 + 7 = \boxed{}$ f) $10 + 3 = \boxed{}$

2. How many tens or units does the red number show?

The first one has been done for you.

a) **2**7 is 2 tens = $\boxed{20}$ b) 8**6** is 6 units = $\boxed{}$

c) **4**0 is 4 tens = $\boxed{}$ d) **7**3 is 7 tens = $\boxed{}$

e) 6**5** is 5 units = $\boxed{}$ f) **9**9 is 9 tens = $\boxed{}$

g) **5**0 is 5 tens = $\boxed{}$ h) **1**4 is 1 ten = $\boxed{}$

Homework

How many tens and units?

1. 65

2. 13

3. 49

4. 88

5. 30

6. 97

Round off to the nearest ten

To round off to ten, find the ten that the number is nearest to.

Example

Round **up** to the nearest ten for numbers that end with 5, 6, 7, 8 and 9.

Round **down** to the nearest ten for numbers that end with 4, 3, 2, 1 and 0.

1. What ten is 59 nearest to?
2. What ten is 52 nearest to?
3. What ten is 55 nearest to?

Round up and down to the nearest ten.

- | | | |
|------------------------------|------------------------------|------------------------------|
| 1. 48 → <input type="text"/> | 2. 71 → <input type="text"/> | 3. 93 → <input type="text"/> |
| 4. 16 → <input type="text"/> | 5. 57 → <input type="text"/> | 6. 45 → <input type="text"/> |
| 7. 94 → <input type="text"/> | 8. 82 → <input type="text"/> | 9. 66 → <input type="text"/> |

Roman and Arabic numbers

We usually use Arabic numerals like these when we write numbers:

We can also write numbers as Roman numerals like these:

1. Choose the correct Roman numeral for each Arabic number.

a) 2 $\rightarrow$ b) 7 $\rightarrow$
c) 3 $\rightarrow$ d) 10 $\rightarrow$
e) 4 $\rightarrow$ f) 5 $\rightarrow$

2. Write these Roman numerals as Arabic numbers.

a) ii b) v c) vii d) ix e) iii
f) viii g) i h) vi i) x j) iv

Homework

1. Round up or down to the nearest ten.

a) 48 $\rightarrow$ b) 71 $\rightarrow$
c) 93 $\rightarrow$ d) 16 $\rightarrow$

2. Add the Roman or Arabic numerals to these clocks.

Revision

1. Count the beads on the abacus. Write the numeral and the number in words.

numeral _____ words _____

2. Count forwards and backwards. Fill in the missing numbers.

a) 84 80 76 _____ 56 _____

b) 13 _____ 48

3. Write the numbers. Circle the even numbers and underline the odd numbers.

44 31 60 129 58 117 106 130 195 200 146 62

4. Fill in the numbers **before**, **after** or **between**.

a)

	133	134
--	-----	-----

 b)

107	108	
-----	-----	--

 c)

82		84
----	--	----

5.

	100	105						135	140		150
--	-----	-----	--	--	--	--	--	-----	-----	--	-----

a) Count in 10s from smallest to biggest.

b) Count in 5s from biggest to smallest.

6. Write the number.

a) $10 + 9 = \square$

b) $50 + 5 = \square$

7. How many tens and ones in these numbers?

a) 67

b) 33

c) 84

8. Round up or down to the nearest ten.

a) $78 \rightarrow \square$ b) $21 \rightarrow \square$ c) $95 \rightarrow \square$

9. Add the missing Roman or Arabic numerals to the clocks.

a)

b)

UNIT 3

Order and compare numbers

Ordinal numbers from first to thirteenth

Ordinal numbers show the position of something.

Example

You can write ordinal numbers in numerals and in words.

Look at the line-up for Gweru Primary soccer team.

1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
first	second	third	fourth	fifth	sixth	seventh	eighth	ninth	tenth

The boy in the green jersey is 3rd/third. The boy in the light green jersey is 10th/tenth.

Look at the picture of the soccer team.

1. Write the ordinal number. The first one has been done for you.

a)  is 9th.

b)  is ____.

c)  is ____.

d)  is ____.

2. Write the colour of the jersey that comes:

a) before 5th.

b) between 8th and 10th.

c) after 1st.

d) between 6th and 8th.

3. Match the ordinal numbers and the number names.

twenty-first eighth fourth twenty-third
second twelfth fifteenth thirtieth

4. Write the ordinal numbers from lowest to highest.

17th 3rd 10th 19th 26th 4th 25th 30th

5. Write the ordinal numbers from highest to lowest.

first eleventh sixteenth third eighteenth
twenty-ninth fifteenth twenty-fourth

6. Thirty schools in Zimbabwe are competing in an under-9 soccer tournament. The rankings are:

1st	Binga Primary	16th	Marula Primary
2nd	Disi Primary	17th	Dett Primary
3rd	Rusape Primary	18th	Mavis Primary
4th	Beitbridge Primary	19th	Zaka Primary
5th	Gwanda Primary and Luck Primary	20th	Wankie Primary
6th	Mbizi Primary	21st	Baruru Primary
7th	Bulawayo Primary	22nd	Leopard Primary
8th	Nyati Primary	23rd	Rupisisi Primary
9th	Gweru Primary	24th	Mazoe Primary
10th	Kadoma Primary	25th	Somabula Primary
11th	Kezi Primary	26th	Lusulu Primary
12th	Que Que Primary	27th	Seboza Primary
13th	Tuli Primary	28th	Gokwe Primary
14th	Harare Primary	29th	Sipolilo Primary
15th	Masvingo Primary	30th	Nyala Primary

- Name the schools that came first, second and third in the tournament?
- What is the ranking of the school that came last?
- ___ and ___ schools tied in the 5th position.
- Leopard Primary School is ranked ___.

Homework

21st 2nd 18th 6th 4th 15th 7th 3rd 5th
30th 29th 1st 24th 13th

1. Write the ordinal numbers from highest to lowest.
2. Write the ordinal number names for each number.

Order numbers

Tourists love to visit Hwange National Park to see the wild animals.

1. This is how many tourists visited the park in one week. Order the numbers from highest to lowest.

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
55	64	97	113	147	200	192

2. Here are some of the animals the tourists saw. Order the numbers from lowest to highest.

Birds	Buck	Elephants	Crocodiles	Fish	Insects	Zebras
176	105	43	21	118	182	59

Homework

1. Write the numbers from lowest to highest.

82 59 103 200 45 28 67 154 30 149

2. Write the numbers from highest to lowest.

65 28 103 47 99 181 92 56 174 200

<, > or =

We use the < sign to show less than. We use > to show bigger than. We use = to show equal to.

Examples

$$10 > 4$$

$$15 < 20$$

$$130 = 130$$

1. Fill in <, > or =.

a) $37 \square 41$ b) $94 \square 94$ c) $53 \square 27$

2. Calculate and choose the correct sign.

a) $40 + 3 \square 60 + 1$

b) $100 + 60 + 6 \square 100 + 60 + 2$

c) $9 \text{ tens} + 0 \text{ units} \square 6 \text{ tens} + 1 \text{ unit}$

Estimate and count

When you **estimate** you guess how much there is.

Example

Guess how many balls there are in the sports bag. Now count each ball in the sports bag.

1. Estimate and then count the objects.

a)  Estimate: _____ books Count: _____ books	b)  Estimate: _____ marbles Count: _____ marbles
---	--

Revision

1. Fill in the missing ordinal numbers on the necklace.

2. Write the numbers from lowest to highest.

(32) (13) (199) (28) (103) (97) (155)

3. Write the numbers from highest to lowest.

(53) (101) (74) (52) (65) (186) (198)

4. Choose the correct sign for each sentence.

a) $80 + 5$ ☐ $<$ ☐ $>$ ☐ $=$ $30 + 1$

b) $100 + 10 + 2$ ☐ $<$ ☐ $>$ ☐ $=$ $100 + 20 + 4$

c) 4 tens + 6 units ☐ $<$ ☐ $>$ ☐ $=$ 5 tens + 6 units

5. Estimate and count.

	Estimate: _____ circles Count: _____ circles
---	---

Add numbers without carrying

 $63 + 35 = \square$

Then add the **tens**.

cs. T U

s. 6 3

+ 3 5

 8

+

	T	U
+	6	3
	3	5
	9	8

$$\begin{array}{r} \text{T} \quad \text{U} \\ 6 \quad 3 \\ + \quad \underline{3 \quad 5} \\ \hline 9 \quad 8 \end{array}$$

- a) T U

$$\begin{array}{r} 43 \\ + 36 \\ \hline \end{array}$$

- b) T U

$$\begin{array}{r} 61 \\ + 28 \\ \hline \end{array}$$

- c) T U

$$\begin{array}{r} 54 \\ + 44 \\ \hline \end{array}$$

- d) T U

$$\begin{array}{r} 72 \\ + 45 \\ \hline \end{array}$$

Example

$$\begin{array}{r} 45 \\ + 53 \\ \hline 98 \end{array}$$

2. Find the missing numbers.

a)

	T	U
	4	
+	2	7
	6	8

b)

	T	U
	5	3
+		5
	8	8

c)

	T	U
		4
+	2	1
	6	5

d)

	T	U
	4	2
+		
	5	6

Add numbers with carrying

Carry over once

Example

$47 + 36 = \square$

Step 1: Make 1 ten and carry it to the tens column. Then write the units in the units column.

	T	U
	[1]4	7
+	3	6
		3

Step 2: Add the tens in the tens column.

	T	U	TU
	[1]4	7	[1]47
+	3	6	+ 36
	8	3	83

Carry the ten. Add the numbers.

1.

	T	U
		7 5
+	1	6

2.

	T	U
		5 8
+	2	3

3.

	T	U
		4 9
+	4	1

4.

	T	U
		6 4
+	3	7

5.

	T	U
		2 5
+	3	8

6.

	T	U
		8 2
+	1	9

Solve the problems

Solve these word problems. Show how you worked out the answer.

Hint

When you do word problems, firstly work out which operation you should use. Do you add, subtract, times or divide?

1. The vegetable seller sold 34  and 52  at the market. How many vegetables did he sell altogether?
2. The man bought a 25 kg  and a 15 kg . What is the total mass of the items he bought?
3. The market opens at  in the morning. It closes at  in the afternoon. How many hours is the market place open for?
4. A tourist bought a  for \$38 and a  for \$45. How much must the tourist pay altogether?

Group and add

You can add numbers together in any order. The answer will always be the same.

Example

$$8 + 5 = 5 + 8$$

$$\boxed{13} = \boxed{13}$$

You can group numbers together in different ways when you add. The answer will always be the same.

$$(8 + 5) + 3 = 8 + (5 + 3)$$

$$\boxed{16} = \boxed{16}$$

1. Fill in the missing numbers.

a) $15 + 12 = 12 + \square$

b) $34 + 23 = \square + 34$

c) $\square + 47 = 47 + 16$

d) $84 + \square = 13 + \square$

e) $92 + 7 = \square + \square$

f) $\square + \square = 61 + 25$

2. Group the objects. Add in two different ways.

Homework

Fill in the missing numbers.

1. $35 + 2 = 2 + \square$

2. $18 + 21 = \square + \square$

3. $\square + \square = 34 + 93$

Revision

1. Add the numbers.

a)
$$\begin{array}{r} \text{T} \quad \text{U} \\ 2 \quad 3 \\ + 5 \quad 6 \\ \hline \end{array}$$

b)
$$\begin{array}{r} \text{T} \quad \text{U} \\ 7 \quad 1 \\ + 2 \quad 5 \\ \hline \end{array}$$

c)
$$\begin{array}{r} \text{T} \quad \text{U} \\ 6 \quad 2 \\ + 1 \quad 4 \\ \hline \end{array}$$

2. Find the missing numbers.

a)
$$\begin{array}{r} \text{T} \quad \text{U} \\ 3 \quad \square \\ + 1 \quad 7 \\ \hline 4 \quad 8 \end{array}$$

b)
$$\begin{array}{r} \text{T} \quad \text{U} \\ 8 \quad 5 \\ + 1 \quad \square \\ \hline 9 \quad 7 \end{array}$$

c)
$$\begin{array}{r} \text{T} \quad \text{U} \\ \square \quad 1 \\ + 2 \quad 6 \\ \hline 8 \quad 7 \end{array}$$

3. Carry the ten. Add the numbers.

a)
$$\begin{array}{r} \text{T} \quad \text{U} \\ \square \quad 3 \quad 5 \\ + 2 \quad 6 \\ \hline \end{array}$$

b)
$$\begin{array}{r} \text{T} \quad \text{U} \\ \square \quad 3 \quad 9 \\ + 5 \quad 1 \\ \hline \end{array}$$

c)
$$\begin{array}{r} \text{T} \quad \text{U} \\ \square \quad 7 \quad 4 \\ + 1 \quad 7 \\ \hline \end{array}$$

4. There are 15 drummers and 24 dancers on stage at the dance festival. How many people are performing altogether? Show your working.

5. Show how to add and group numbers in any order. Fill in the missing numbers.

a) $28 + 31 = \square + \square$

b) $\square + \square = 42 + 95$

c) $(14 + 7) + 18 = \square + (\square + \square)$

Add numbers without carrying

An easy way to add big numbers is to add them vertically.

Example

$$142 + 437 = \square$$

First, add the units. Then add the **tens**. Then add the hundreds.

H	T	U		H	T	U		H	T	U		HTU
1	4	2		1	4	2		1	4	2		142
+	4	3	7	+	4	3	7	+	4	3	7	+ 437
		9			7	9		5	7	9		<u>579</u>

1. Add the numbers.

a)

H	T	U
4	1	3
+	3	0
<u>2</u>		

b)

H	T	U
6	1	4
+	2	8
<u>5</u>		

c)

H	T	U
5	4	7
+	3	1
<u>1</u>		

d)

H	T	U
7	1	6
+	1	5
<u>3</u>		

2. Count on a number line to find the missing number.

a) H T U	b) H T U	c) H T U	d) H T U
4 2	5 3 2	4 2 9	1 3 8
+ 2 7 1	+ 2 4	+ 2 3	+ 2 4 1
<u>6 9 5</u>	<u>7 5 6</u>	<u>6 5 9</u>	<u> </u>

3. Do this vertical addition. Choose the correct answer (A, B or C).

H T U			
2 0 7	A 736	B 657	C 756
+ 5 4 9			
<u> </u>			

Add numbers with carrying over twice

Example

$157 + 266 = \boxed{}$

Step 1: Make 1 ten and carry it over to the tens column. Then write the units in the units column.

Step 2: Make 1 hundred and carry it over to the hundreds column. Then write the tens in the tens column.

Step 3: Add the hundreds.

H	T	U
^[1] 1	^[1] 5	7
2	6	6
4	2	3

H T U
+ 1 5 7
<u>2 6 6</u>
<u>4 2 3</u>

H	T	U
1	^[1] 5	7
2	6	6
		3

H	T	U
^[1] 1	^[1] 5	7
2	6	6
	2	3

Carry the tens and hundreds. Add the numbers.

$$\begin{array}{r} \text{1.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 3 & \square & 5 \square 4 \\ + 1 & 6 & 7 \\ \hline \end{array} \end{array}$$

$$\begin{array}{r} \text{2.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 2 & \square & 7 \square 5 \\ + 6 & 3 & 8 \\ \hline \end{array} \end{array}$$

$$\begin{array}{r} \text{3.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 3 & \square & 5 \square 4 \\ + 2 & 6 & 6 \\ \hline \end{array} \end{array}$$

$$\begin{array}{r} \text{4.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 7 & \square & 1 \square 5 \\ + 1 & 9 & 6 \\ \hline \end{array} \end{array}$$

$$\begin{array}{r} \text{5.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 4 & \square & 8 \square 2 \\ + 3 & 1 & 5 \\ \hline \end{array} \end{array}$$

$$\begin{array}{r} \text{6.} \quad \begin{array}{ccc} \text{H} & \text{T} & \text{U} \\ 5 & \square & 4 \square 3 \\ + 3 & 6 & 7 \\ \hline \end{array} \end{array}$$

Homework

Add these numbers vertically and carry over 1 ten and 1 hundred.

$$\text{1.} \quad 147 + 465$$

$$\text{2.} \quad 283 + 438$$

$$\text{3.} \quad 566 + 291$$

$$\text{4.} \quad 176 + 354$$

$$\text{5.} \quad 224 + 287$$

$$\text{6.} \quad 491 + 329$$

Solve the problems

There are clue words in a word problem. They tell you which operation to use.

Example

There are 47 drums and 13 shakers in the music box. How many instruments are there **altogether**?

The clue word **altogether** tells you to add.

Other addition clue words are: **add**, **both**, **sum**, **more**, **double** and **total**.

Find the numbers. Solve the problems.

1. The music and dance festival was a success. The table shows you how many tickets were sold over the weekend.

Day	Number of tickets sold
Saturday	418
Sunday	523

- a) On which day of the weekend were more tickets sold?
- b) What is the total number of tickets sold over both days?
- c) If 112 tickets more were sold for Sunday's show, how many people watched altogether on Sunday?
2. Read the bar graph and answer the questions.

- a) How many dancers and drummers were there altogether?
- b) If you add the number of singers and musicians, how many people would there be on stage?
- c) Which performers have double the number of storytellers?

Revision

1. Add the numbers.

a)

	H	T	U
	7	1	4
+	1	6	5

b)

	H	T	U
	5	0	6
+	3	1	2

c)

	H	T	U
	2	8	4
+	4	1	3

2. Find the missing numbers.

a)

	H	T	U
	1	2	□
+	3	7	1
	4	9	5

b)

	H	T	U
	2	2	8
+	2	0	□
	4	2	9

c)

	H	T	U
	□	7	3
+	1	2	1
	6	9	4

3. Carry the tens and hundreds. Add the numbers.

a)

	H	T	U
	1	8	□
		4	□
+	6	3	8

b)

	H	T	U
	4	3	□
		5	□
+	2	9	6

c)

	H	T	U
	7	6	□
		5	□
+	9	4	5

4. Solve the word problem. Show your working. Choose the correct answer (A, B or C).

The drinks stalls at the festival sold 251

, 126

and 34

. How many drinks were sold altogether?

A 410 drinks were sold altogether.

B 411 drinks were sold altogether.

C 412 drinks were sold altogether.

UNIT 6

Subtraction (tens and units)

Subtract tens and units

Example

$$35 - 24 = \square$$

Subtract the units. Then subtract the tens.

1. Subtract the numbers.

a)

T	U
4	8
3	6

b)

T	U
6	7
2	5

c)

T	U
5	9
4	4

$$\begin{array}{r} \text{d)} \quad \text{T U} \\ 87 \\ - 16 \\ \hline \end{array}$$

$$\begin{array}{r} \text{e)} \quad \text{T U} \\ 56 \\ - 33 \\ \hline \end{array}$$

$$\begin{array}{r} \text{f)} \quad \text{T U} \\ 79 \\ - 25 \\ \hline \end{array}$$

$$\begin{array}{r} \text{g)} \quad \text{T U} \\ 87 \\ - 16 \\ \hline \end{array}$$

$$\begin{array}{r} \text{h)} \quad \text{T U} \\ 56 \\ - 43 \\ \hline \end{array}$$

$$\begin{array}{r} \text{i)} \quad \text{T U} \\ 93 \\ - 52 \\ \hline \end{array}$$

2. Find the missing numbers.

$$\begin{array}{r} \text{a)} \quad \text{T U} \\ 78 \\ - 2 \square \\ \hline 53 \end{array}$$

$$\begin{array}{r} \text{b)} \quad \text{T U} \\ 54 \\ - 23 \\ \hline \square 1 \end{array}$$

$$\begin{array}{r} \text{c)} \quad \text{T U} \\ 44 \\ - 2 \square \\ \hline 24 \end{array}$$

$$\begin{array}{r} \text{d)} \quad \text{T U} \\ 96 \\ - \square 2 \\ \hline 54 \end{array}$$

$$\begin{array}{r} \text{e)} \quad \text{T U} \\ 79 \\ - 2 \square \\ \hline 53 \end{array}$$

$$\begin{array}{r} \text{f)} \quad \text{T U} \\ 94 \\ - 53 \\ \hline \square \square \end{array}$$

Homework

1. Subtract these numbers vertically.

$$\text{a)} \quad 47 - 23$$

$$\text{b)} \quad 45 - 32$$

$$\text{c)} \quad 54 - 21$$

$$\text{d)} \quad 87 - 12$$

$$\text{e)} \quad 66 - 34$$

$$\text{f)} \quad 49 - 30$$

2. Subtract the numbers. Choose the correct answer (A, B or C).

$$\text{a)} \quad 95 - 33$$

A 26

B 62

C 16

$$\text{b)} \quad 38 - 18$$

A 30

B 10

C 20

Subtract using one equal addition

Example

$$45 - 27$$

To use equal addition to subtract, add the *same* number to the **units** in the **top** row and the **tens** in the **bottom** row.

Step 1: Start with the units.

In this example, we cannot take 7 away from 5. So we add 1 **ten** to the **units** in the **top** row.

T	U
4	^[1] 5
- 2	7

Step 2: Now add the same amount (1 **ten**) to the **tens** in the **bottom** row.

T	U
4	^[1] 5
- ^[3] 2	7

Step 3: Subtract the units from the units.
Subtract the tens from the tens.

T	U
4	^[1] 5
- ^[3] 2	7
1	8

Subtract the numbers using one equal addition.

1. T U
 [□]75
- 16

2. T U
 [□]51
- 23

3. T U
 [□]47
- 29

4. T U
 [□]74
- 57

5. T U
 [□]92
- 38

6. T U
 [□]55
- 36

Homework

Use one equal addition to subtract these numbers.

1. $165 - 37$

2. $41 - 26$

3. $93 - 39$

Solve the problems

Solve these word problems. Show how you worked out the answer.

1. The Moyo family are driving to a game park to see the

. The trip is 64 km. They have travelled 17 km.

How many km do they have left to travel?

2. The entrance fee for the game park is

per car. There are 4 people in

Mr Moyo's family. He gives the guide

. How

much change will the guide give Mr Moyo?

3. A

is stalking a herd of 85

. When the lioness charged, 23 buck ran away. How

many buck are left for the lioness to chase?

4. The family saw 35

in the river. While they

were watching, 8

climbed out of the

water and lay in the sun. How many crocodiles stayed

in the water?

Revision

1. Subtract the numbers.

a)

$$\begin{array}{r} \text{T U} \\ 49 \\ - 34 \\ \hline \end{array}$$

b)

$$\begin{array}{r} \text{T U} \\ 57 \\ - 37 \\ \hline \end{array}$$

c)

$$\begin{array}{r} \text{T U} \\ 73 \\ - 31 \\ \hline \end{array}$$

2. Find the missing numbers.

a)

$$\begin{array}{r} \text{T U} \\ 64 \\ - 53 \\ \hline \square 1 \end{array}$$

b)

$$\begin{array}{r} \text{T U} \\ 94 \\ - 7\square \\ \hline 22 \end{array}$$

Solve the problems

Clue words tell you which operation to use.

Example

There are 126 ripe  on a tree.

31  fell on the ground. How many bananas are **left** on the tree?

The clue word **left** tells you to **subtract**.

Other subtraction clue words are:

difference

fewer

less

how many

minus

subtract

much more

1. Look at the pictures on page 35 and solve the problems. Show your working.

- a) A farmer lost 22 maize plants from drought and monkeys stole 8 watermelons. What is the difference between the number of maize plants that the farmer lost and the number of watermelons that the monkeys stole?
- b) The farmer planted 156 tomato plants. The caterpillars ate 102 plants. How many tomato plants are left?
- c) The farmer sold 10 tomatoes for \$3.20 and 1 watermelon for \$4.00 at the market. How much less did the tomatoes cost?

2. Look at the pictograph and answer the questions.

- How many crates of cassava did the farmer sell?
- Which vegetable is 2 less than 5?
- Which vegetable is 2 more than 5?
- How many vegetables would be left over if the farmer sold all his bananas, cabbages and carrots?

Revision

1. Subtract the numbers.

<u>1</u>		

4. Solve the problem. Show your working.

A farmer harvested 458 vegetables. He harvested 145 onions and 50 potatoes. He also harvested tomatoes. How many tomatoes did the farmer harvest? Choose A, B or C.

A 263 tomatoes B 362 tomatoes C 623 tomatoes

Multiplication (1)

Repeated addition

Example

Count and add the balls in each group.

There are 8 sets of 3 balls each.

We can write 8 sets of 3 like this:

$$3 + 3 + 3 + 3 + 3 + 3 + 3 + 3 = 24$$

It is quicker to multiply (times) the number of the sets by the number of objects in each set.

For example:

$$8 \times 3 = 24$$

We can also write it like this:

$$8(3) = 24$$

We use this symbol $\times$ when we multiply by or times.

1. Count the objects in two different ways.

- a) How many lollipops?

$$5 + 5 + 5 + 5 + 5 + 5 = \square \quad 6 \times 5 = \square$$

- b) How many cupcakes?

$$\square + \square + \square + \square = \square \quad \square \times \square = \square$$

Example

Multiply on a number line to count in groups.

There are 6 groups of 8 paint brushes.

$$8 + 8 + 8 + 8 + 8 + 8 = 48$$

6 groups of 8 paint brushes

$$6 \times 8 = 48$$

2. Work out the answers on a number line. Choose the correct answer each time.

a) There are 5  in each box. How many mangoes will there be in 6 boxes?

A 32

B 30

C 35

b) There are 3  in each nest. How many chicks will there be in 7 nests?

A 23

B 80

C 21

c) There are 6  in a parking garage. How many wheels altogether in the parking garage?

A 24

B 18

C 20

Multiply up to 10

Example

Look at the multiplication grid. It will help you learn your times tables up to 10.

Step 1: Look at a number in the first row, for example 5.

Step 2: Then look at a number in the first column, for example: 3.

Step 3: Multiply the two numbers: $5 \times 3 = \square$.

Step 5: Find the column with 5 in the first row. Then go down until you reach the row with 3. This will give you the answer. So $5 \times 3 = 15$.

	0	1	2	3	4	5	6	7	8	9	10
0	0	0	0	0	0	0	0	0	0	0	0
1	0	1	2	3	4	5	6	7	8	9	10
2	0	2	4	6	8	10	12	14	16	18	20
3	0	3	6	9	12	15	18	21	24	27	30
4	0	4	8	12	16	20	24	28	32	36	40
5	0	5	10	15	20	25	30	35	40	45	50
6	0	6	12	18	24	30	36	42	48	54	60
7	0	7	14	21	28	35	42	49	56	63	70
8	0	8	16	24	32	40	48	56	64	72	80
9	0	9	18	27	36	45	54	63	72	81	90
10	0	10	20	30	40	50	60	70	80	90	100

1. Use the multiplication grid to learn your 6 times tables.

a) 0×6 b) 1×6 c) 2×6 d) 3×6

e) 4×6 f) 5×6 g) 6×6 h) 7×6

i) 8×6 j) 9×6 k) 10×6

2. Can you work out these 6 times tables?

a) 11×6 b) 12×6 c) 100×6

3. Use the multiplication grid to do these times spider calculations.

Homework

1. How much will three T-shirts cost?

$$\square + \square + \square = \square$$

$$\square \times \square = \square$$

2. a) wheels on 8

b) spots on 7

c) fingers on 5

d) cakes in 3

Revision

1. Write the multiplication number sentence.

a)

$$\square \times \square = \square$$

b)

$$\square \times \square = \square$$

c)

$$\square \times \square = \square$$

2. Use a multiplication grid to work out the times calculations.

a) $4 \times 4 = \square$ b) $9 \times 2 = \square$ c) $5 \times 3 = \square$

d) $6 \times 7 = \square$ e) $10 \times 5 = \square$ f) $7 \times 8 = \square$

g) $0 \times 4 = \square$ h) $7 \times 7 = \square$ i) $5 \times 9 = \square$

3. Write a times calculation to show how many.

a) candles on 2

b) stripes on 5

4. Do these times spider calculations.

We use this symbol $\div$ when we divide or share equally.

Example

You can divide by subtracting the same number over and over until there is nothing left.

$$24 \div 4 = \square$$

Share the biscuits equally between the children. How many biscuits does each child receive?

$$24 - 4 = 20$$

$$20 - 4 = 16$$

$$16 - 4 = 12$$

$$12 - 4 = 8$$

$$8 - 4 = 4$$

$$4 - 4 = 0$$

(There are no biscuits left over.)

Count how many times you subtracted 4.

We did -4 six times, so $24 \div 4 = 6$ biscuits.

Example

If you cannot divide or share objects or numbers equally, you have some left over. The left over is called the remainder.

Divide the apples equally into 7 boxes. How many apples in each box? How many apples left over?

$$30 - 7 = 23 \quad 23 - 7 = 16 \quad 16 - 7 = 9 \quad 9 - 7 = 2$$

We did **-7** four times, but we could not subtract another 7. We had 2 apples left over. We write remainder as r.

We write our working like this: $30 \div 7 = 4 \text{ r } 2$

Share equally

Share the objects equally. Count how many times you subtract.

$$14 \div 2 = \square$$

$$21 \div 3 = \square$$

$$38 \div 5 = \square$$

We can also divide on a number line.

Repeated subtraction

Use repeated subtraction to work out the division calculations.

1. $24 \div 6$

2. $32 \div 8$

3. $40 \div 5$

4. $27 \div 4$

5. $39 \div 2$

6. $28 \div 3$

Example

Divide is the opposite of multiply. For example:

$$6 \times 4 = 24 \longrightarrow 24 \div 6 = 4$$

Use the multiplication table to learn division facts up to 10.

Step 1: Look at the number in the **first row**, for example 6.

Step 2: Then look at a number in the **first column**, for example 4.

Step 3: Multiply the two numbers to find the answer:

$$6 \times 4 = 24$$

Step 4: Start with the answer (24) to divide. Go up to the first row (6) and across to the first column (4). Divide the numbers: $24 \div 6 = 4$

	0	1	2	3	4	5	6	7	8	9	10
0	0	0	0	0	0	0	0	0	0	0	0
1	0	1	2	3	4	5	6	7	8	9	10
2	0	2	4	6	8	10	12	14	16	18	20
3	0	3	6	9	12	15	18	21	24	27	30
4	0	4	8	12	16	20	24	28	32	36	40
5	0	5	10	15	20	25	30	35	40	45	50
6	0	6	12	18	24	30	36	42	48	54	60
7	0	7	14	21	28	35	42	49	56	63	70
8	0	8	16	24	32	40	48	56	64	72	80
9	0	9	18	27	36	45	54	63	72	81	90
10	0	10	20	30	40	50	60	70	80	90	100

1. Work out the answers. Then match the calculations.

a) 8×4

$35 \div 7$

b) 10×3

$32 \div 8$

c) 5×7

$30 \div 3$

d) 6×5

$32 \div 4$

e) 4×8

$36 \div 9$

f) 9×4

$30 \div 5$

2. Use the multiplication grid to work out the division calculations.

a) $30 \div 5$

b) $27 \div 3$

c) $36 \div 3$

d) $54 \div 6$

e) $48 \div 8$

f) $25 \div 5$

g) $28 \div 4$

h) $63 \div 7$

i) $81 \div 9 =$

3. Fill in the missing numbers.

a) $30 \div \square = 5$

b) $24 \div \square = 6$

c) $45 \div \square = 9$

d) $\square \div 8 = 10$

e) $\square \div 9 = 3$

f) $\square \div 7 = 2$

Homework

Write the division calculation for each picture.

1.

$\square \div \square = \square$

2.

$\square \div \square = \square$

Revision

1. Divide the objects equally. Write the answer.

a) Share the balls between the children.

$$\square \div \square = \square$$

b) Share the fruit between the bowls.

$$\square \div \square = \square$$

2. Use repeated subtraction to work out the division calculations.

a) $54 \div 6$

b) $32 \div 5$

c) $81 \div 9$

d) $25 \div 5$

e) $41 \div 10$

f) $63 \div 7$

3. Fill in the missing numbers.

a) $27 \div \square = 3$

b) $\square \div 3 = 8$

c) $54 \div 6 = \square$

d) $\square \div 8 = 10$

4. Write the division number sentence to match the multiplication calculations.

a) 5×4	$\square \div \square = \square$
b) 7×3	$\square \div \square = \square$
c) 5×8	$\square \div \square = \square$
d) 9×6	$\square \div \square = \square$

Read and write fractions

A **fraction** is a part of one whole object or number. A **fraction** tells you how much you have of that object or number.

Example

This is one whole pizza.

If you want to eat part of the pizza, you cut it into smaller pieces.

This pizza is cut into two halves.

It is still one whole pizza, but cut into two parts.

Gugu eats one half of the pizza. We write one half as: $\frac{1}{2}$

$$\frac{1}{2}$$

← The top number tells you how many parts of the pizza Gugu ate.

← The bottom number tells you how many parts the pizza was cut into.

This pizza is cut into four quarters.

It is still one whole pizza, but cut into four parts.

Gugu eats one quarter of the pizza.

We write one quarter like this: $\frac{1}{4}$

$$\frac{1}{4}$$

← Gugu eats one slice.

← The pizza was cut into four slices.

1. Circle the fraction that matches the picture.

a)

- $\frac{1}{2}$ $\frac{2}{4}$ $\frac{1}{5}$

b)

- $\frac{1}{5}$ $\frac{3}{5}$ $\frac{2}{10}$

c)

- $\frac{1}{4}$ $\frac{1}{2}$ $\frac{1}{5}$

d)

- $\frac{1}{5}$ $\frac{3}{4}$ $\frac{2}{10}$

2. Match the fraction number with the correct fraction words.

a) $\frac{1}{4}$

two halves

b) $\frac{3}{5}$

four fifths

c) $\frac{8}{10}$

one half

d) $\frac{1}{2}$

three quarters

e) $\frac{3}{4}$

eight tenths

f) $\frac{2}{2}$

one quarter

g) $\frac{4}{5}$

two tenths

h) $\frac{2}{10}$

three fifths

3. Write the fraction for each picture.

a)

b)

c)

d)

4. Draw and colour the parts of each shape to show the fraction.

a)

$$\frac{2}{4}$$

b)

$$\frac{1}{4}$$

c)

$$\frac{3}{5}$$

d)

$$\frac{1}{4}$$

e)

$$\frac{4}{4}$$

f)

$$\frac{4}{4}$$

5. Choose the correct fraction to match the picture.

A $\frac{3}{4}$

B $\frac{4}{4}$

C $\frac{2}{4}$

Group fractions

You can write fractions for groups of objects.

Examples

$$\frac{1}{2} = 5 \text{ chicks}$$

$$\frac{2}{4} = 8 \text{ juice boxes}$$

$$\frac{4}{10} = 4 \text{ bags of marbles}$$

$$\frac{3}{5} = 45 \text{ lollipops}$$

Group the shapes to show the fractions.

$$\frac{1}{2} = \text{ of the circles}$$

$$= \boxed{} \text{ circles}$$

$$\frac{2}{4} \text{ of the squares}$$

$$= \boxed{} \text{ squares}$$

$$\frac{1}{3} \text{ of the triangles}$$

$$= \boxed{} \text{ triangles}$$

$$\frac{3}{4} \text{ of the ovals}$$

$$= \boxed{} \text{ ovals}$$

Revision

1. Draw and colour the parts of each shape to show the fraction.

a)

$$\frac{3}{4}$$

b)

$$\frac{1}{2}$$

c)

$$\frac{1}{10}$$

d)

$$\frac{1}{2}$$

2. Write the fraction for each picture.

a)

b)

c)

3. Make groups to show the fractions.

a)

$$\frac{1}{2} \text{ of the squares}$$

$$= \boxed{} \text{ squares}$$

b)

$$\frac{3}{4} \text{ of the squares}$$

$$= \boxed{} \text{ squares}$$

Zimbabwean coins and notes

Example

We use dollars and cents in Zimbabwe. Our money has 7 different notes (paper money) and 5 different coins.

1. Work in groups. Answer the questions.
 - a) How many silver bond coins are there? Name them.
 - b) What picture is on the \$5 note?
 - c) What does the writing at the back of the \$10 note say?
 - d) What does the writing at the bottom of all the coins say?
2. Write the notes from the smallest to the biggest.
3. Write the coins from the biggest to smallest.

Look at the picture of the market and answer the questions.

4. How much do these items cost?
 - a) 1 pair of sunglasses + 1 netball ball + 1 cap = \$____
 - b) 1 butternut + 2 tomatoes + 3 bananas = \$____
 - c) 1 clay bowl + 1 cap + 1 bunch of flowers = \$____
5. What coins and notes would you use to pay for these items?
 - a) a wooden mask
 - b) 2 bags of dried beans
 - c) a soccer ball, a netball, a plastic ball
6. Choose the correct coin or note in each row.

a) \$1 note → 

b) 50c coin → 

c) \$10 note → 

d) 25c coin → 

7. How much altogether?

a)  =

b)  =

c)  =

d)  =

Example

There are 100 cents in 1 dollar. You can add different coins and notes together to make different amounts.

	is the same as	
		
		
		

8. How many cents?

a)  =

b)  =

9. How many dollars?

a) 4  +  =

b) 10  +  =

c) 8  =

Homework

- Tariro bought 4 sweets for 25c and 1 juice for \$1. How much did he spend altogether?
- Tanaka bought a bag of tomatoes for \$2 and a bag of onions for \$2. She paid with a \$5 dollar note. How much change will Tanaka get?

Work with money

1. Fill in $>$, $<$, or $=$.

a)  +  +  +   +  +  + 

b)  +  +   +  + 

c)  +  +  +  

2. Break these bigger amounts into smaller amounts.

a)  = 25c + + 50c + 10c + 25c + 5c +

b)  = + \$1 + \$1 + 50c + 50c

c)  = + + + 5c + 5c + 25c

3. Read the sign and answer the questions.

a) How much does it cost for an adult, a child over 12 years and a child under 12 years to enter the viewing area?

b) How much would the tickets be for 2 adults, and 1 child under 12 years?

Revision

- Write the amounts of the notes and coins from the smallest to the biggest.

- Look at the pictures and prices. How much do these items cost?

- 1 pair of jeans + 1 dozen eggs + 1 cabbage = \$___
 - 1 cap + 1 bottle of water + 1 T-shirt = \$___
 - 2 dozen eggs + 2 bottles of water = \$___
- How much altogether?

a)  +  +  +  =

b)  +  +  +  =

c)  +  +  =  =

- Draw the coins and notes to make these amounts.

a) \$2.50

b) 75c

c) \$8.00
